

Admin Action Log

1. Product specification

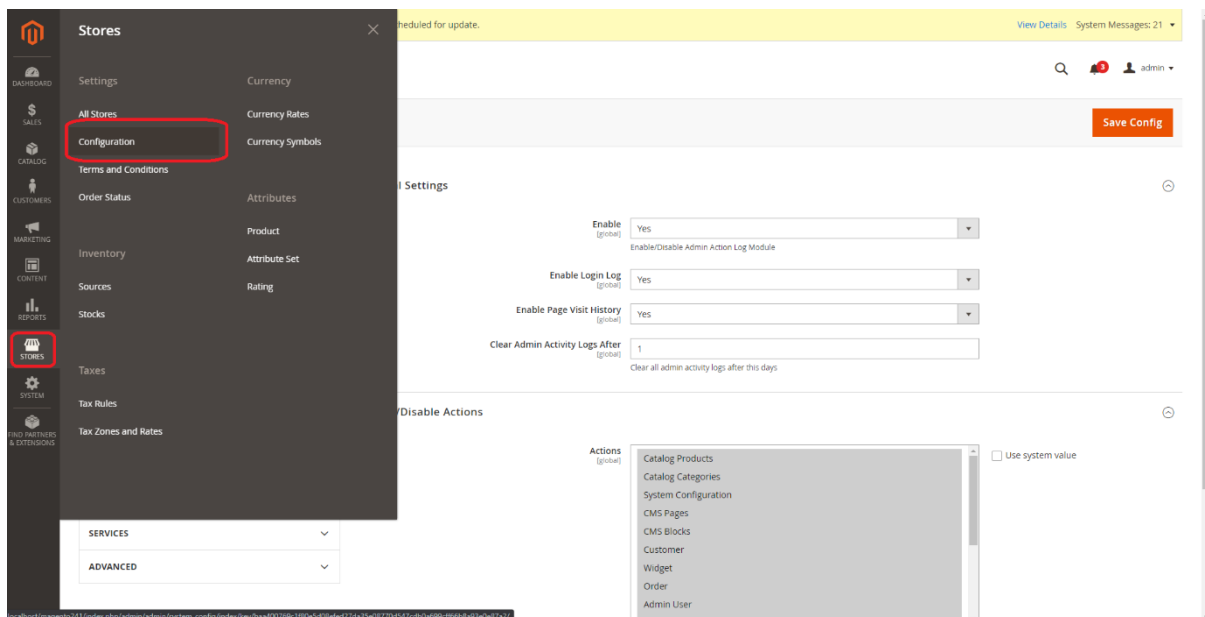

The Admin Action Logs displays a detailed record of all admin actions that are enabled for logging. Each record is time stamped and records the IP address and name of the user. The log detail includes admin user data and related changes that were made during the action.

2. Features

- Enable/Disable Extension.
- Enable/Disable Page visit history.
- Enable/Disable Login Log.
- Track automatically all logged actions.
- Keep log details for a predefined time period.
Access control for admin users.

3. Configuration

From the admin backend, go to **Stores > Configuration>PITS Configuration > AdminActionLog** or **System > AdminActionLog > Configuration >**

The screenshot displays the PITS System Configuration interface. On the left, a dark sidebar contains a navigation menu with 'SYSTEM' highlighted and 'Configuration' selected. The main content area is titled 'System' and features a search bar, a 'Save Config' button, and several configuration fields. The 'Enable' field is set to 'Yes', 'Enable Login Log' is set to 'Yes', and 'Enable Page Visit History' is set to 'Yes'. Below these fields, there is a section for 'Actions' with a list of items including 'Catalog Products', 'Catalog Categories', 'System Configuration', 'CMS Pages', 'CMS Blocks', 'Customer', 'Widget', 'Order', and 'Admin User'. A 'Use system value' checkbox is also present.

3.1 Configure Admin Action Log

3.1.1 General Settings

1. Select **Yes** from dropdown options in the **Enable** field to enable module.
2. Select **Yes** from dropdown options in the **Enable Login Log** field to enable logging of login actions.
3. Select **Yes** from dropdown options in the **Enable Page Visit History** field to enable logging of page view actions.

The screenshot shows the PITS Configuration interface. On the left is a vertical sidebar with various menu items. The main content area is titled 'Configuration' and includes a 'Scope' dropdown set to 'Default Config' and a 'Save Config' button. The 'PITS CONFIGURATION' section is expanded, and 'Admin Action Log' is selected. The 'General Settings' section contains four fields: 'Enable' (Yes), 'Enable Login Log' (Yes), 'Enable Page Visit History' (Yes), and 'Clear Admin Activity Logs After' (1). The 'Enable/Disable Actions' section is currently empty.

4. Enter the number of days in the **Clear Admin Activity Logs After** field to clear the logs.

3.1.2 Enable/Disable Actions

1. Select the sections from dropdown options in the **Actions** field to enable the logging of respective actions.

This screenshot shows the 'Enable/Disable Actions' section of the configuration page. A dropdown menu is open, displaying a list of actions: Customer, Widget, Order, Admin User, Customer Group, Catalog Promotion, and Cart Promotion. The 'Use system value' checkbox is unchecked. A red box highlights the dropdown menu.

3.1.3 Manage User Role

Step 1: Go to Admin > System > User Roles

The screenshot shows the Magento Admin interface. A dark sidebar menu is open, displaying various system management options. The 'User Roles' option is highlighted with a red box. The main content area shows a dashboard with a 'Reload Data' button and a 'Go to Advanced Reporting' button. A table displays financial data: Revenue \$0.00, Tax \$0.00, Shipping \$0.00, and Quantity 0. Below the table are tabs for 'Sellers', 'Most Viewed Products', 'New Customers', and 'Customers'. The footer contains copyright information for Magento Commerce Inc. and the version number 2.3.2.

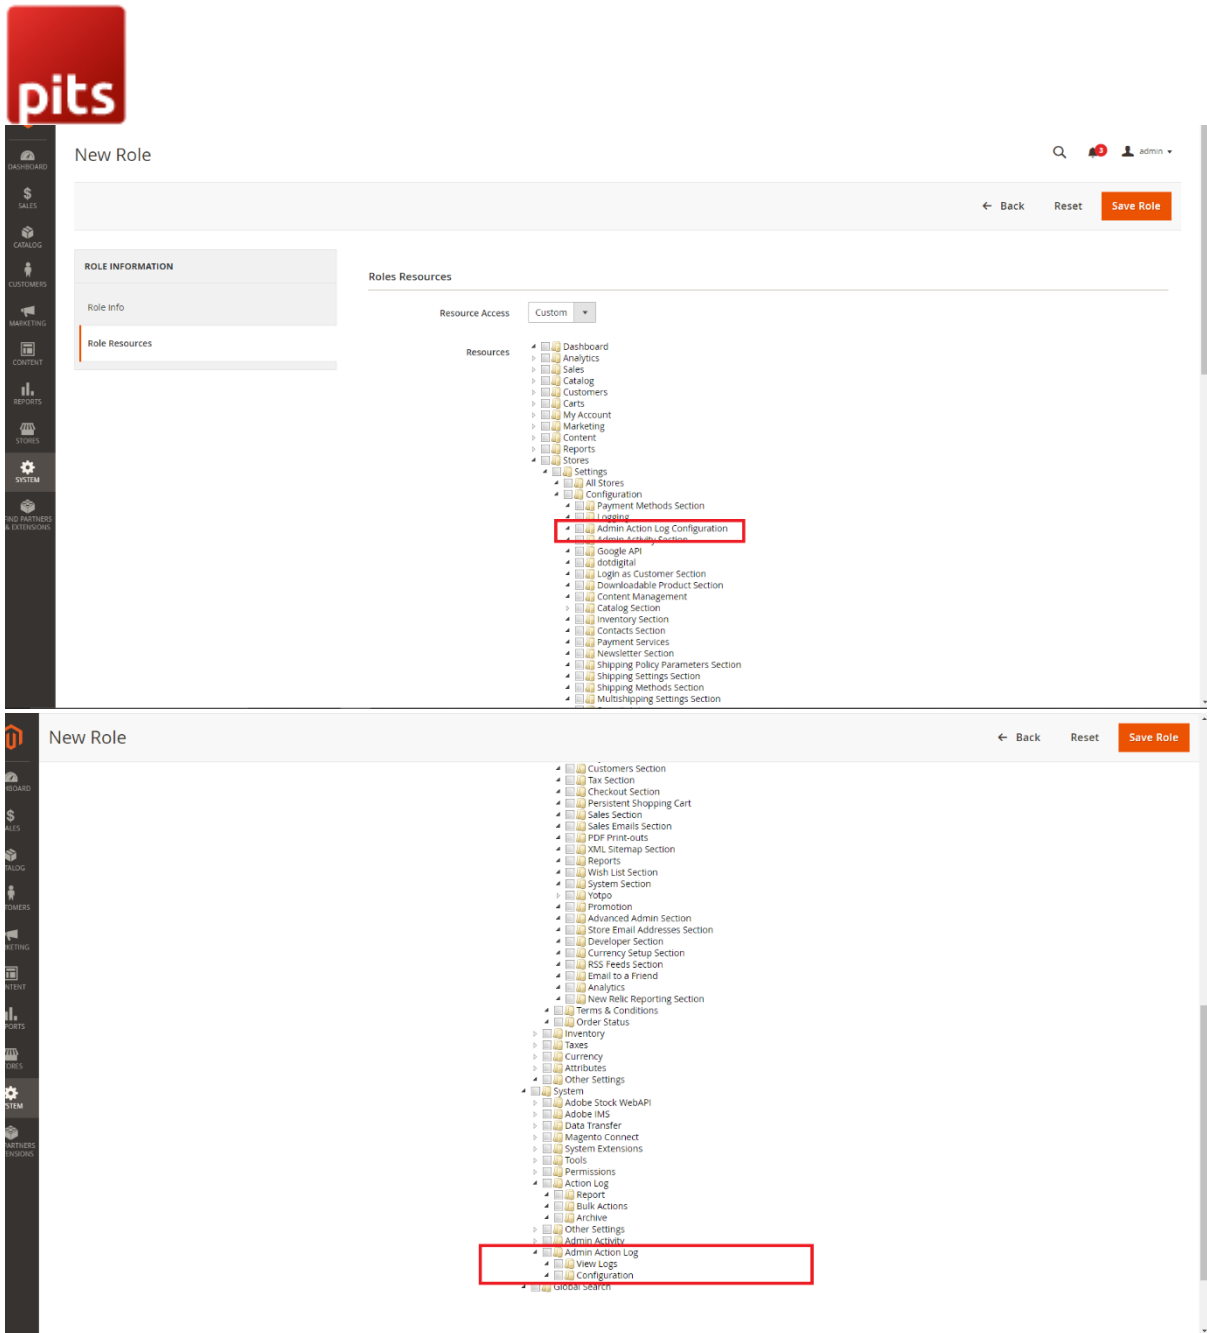

Step 2: Add a new role resource

Fill in the role information section.

New Role

The screenshot shows the 'New Role' form in the Magento Admin. The form is divided into two main sections: 'Role Information' and 'Current User Identity Verification'. The 'Role Information' section has a 'Role Name' field with the value 'admin'. The 'Current User Identity Verification' section has a 'Your Password' field with masked characters. The form also includes a 'Role Info' section and a 'Role Resources' section.

Select **Admin Action Log Configuration & Admin Action Log** at Role Resources section.

Step 3: Set role users for admin accounts, then click on **Save Role** to finish.

4. Admin Action Log

This extension records (logs) every change made by an admin who works in your store. This allows you to track all the changes made to your store. Tracking these changes, along with setting admin permissions for a user, can help to secure your store from unwanted changes.

16. Product Attributes Set
17. Tax Rules
18. Tax Rate

5. Supported Languages

English, German and French.

6. Pre-requisites

Magento Open Source (CE) 2.4.x.

7. Installation

If downloading as zip, to install the module follow the steps below:

Step 1: Download the module/extension and unzip it.

Step 2: Access your web server directories and upload the content of the folder into `app/code/Pits/ AdminActionLog /` directory.

Step 3: Run the following commands to complete the installation.

1. Enable the module - `php bin/magento module:enable`
2. Update of the database - `php bin/magento setup:upgrade`
3. Generate and pre-compile classes - `php bin/magento setup:di:compile`
4. Deploy static files - `php bin/magento setup:static-content:deploy`

8. Change Log / Release Notes
