1.0 About WPBAKERY Isotope Addon

Isotope gallery addon or extension for WPBakery page builder, which allows you to add different types and fully responsive isotope galleries. It provides various layout modes of galleries that can be implemented. It also provides options for managing grid space and also provision for adding unified horizontal scrollbar.

2.0 Element Setup

Step 1: Plugin Installation and Activation

We can install and activate the plugin either by uploading to your directory, using your favorite method (ftp, sftp, scp, etc...) or can be installed from WordPress dashboard itself. On successful activation the element will be available under Isotope tab in Add Elements section.

Fig 1 - Add Element section

Step 2: Element addition.

Add required inputs for the element and customize gallery as per your requirements.

The image shows a settings dialog box titled "WPBakery Isotope Addon Settings". It contains several input fields and dropdown menus:

- Title:** A text input field.
- Box Title:** A text input field.
- Gallery images:** A square button with a green plus sign. Below it is the text "Enter gallery images."
- Grid space:** A text input field. Below it is the text "Enter the spacing between grids".
- Unified horizontal scrollbar:** A dropdown menu with "Default scrollbar of browsers" selected.
- Layout Mode:** A dropdown menu with "Masonry" selected.
- Additional Class:** A text input field. Below it is the text "Add additional class(if any)".

At the bottom of the dialog are two buttons: "Close" (grey) and "Save changes" (blue).

Step 3: Save the element and update the page. Your page with required gallery is all set

3.0 Settings

3.0.1 Title

Title for the gallery section can be added here.

3.0.2 Gallery images

The images which are needed to be added in the gallery can be added using this option.

3.0.3 Grid Space

The space between the images or grid can be added in this option. Required pixel can be entered in the field as number.

Grid space

Enter the spacing between grids

Fig 3 - Grid space settings

3.0.4 Unified horizontal scrollbar

Usually, the horizontal scrollbar will be different for different browsers. This option helps us to make a unified plugin custom scrollbar for all browsers. We can either opt for default scrollbar for different browsers or a unified scrollbar for all browsers.

Unified horizontal scrollbar

Default scrollbar of browsers

Default scrollbar of browsers

unified horizontal scrollbar
