Link Guest Orders to Customer Account

Product specification

Link Orders is a Magento 2 extension developed by PIT solutions which automatically assigns guest orders to the existing customer account with the same email address during customer registration from both frontend and backend.

Features

- During customer registration, it checks if any guest order exists with that email address and if exists then it assigns that to the customer account.

- Link the guest orders placed by registered customers also to customer account.

- Automatically set default shipping and billing addresses to customer.

- Allows configuring a follow-up email for guest orders which can ask customers to register.

- Enable/ Disable the extension.

- Enable/ Disable the follow-up email in extension.

- Access control for admin users.

- All guest orders created with the customer email will be mapped to the customer when creating customer from frontend OR backend.

Installation

To install the Link Guest Orders to Customer Account Extension for Magento 2, follow the steps below.

1) Download the extension.

2) Access your web server directories and unzip and upload the content of the zip file to *app/code/Pits/LinkOrders* directory.

3) Run the following commands from the SSH terminal of the server to complete the installation.

- Enable the module - *php bin/magento module:enable Pits_LinkOrders*
- Update the database schema - *php bin/magento setup:upgrade*
- Generate and pre-compile classes - *php bin/magento setup:di:compile*
- Deploy static files - *php bin/magento setup:static-content:deploy*
- Clear the cache – *php bin/magento cache:flush*

Screenshots / Video
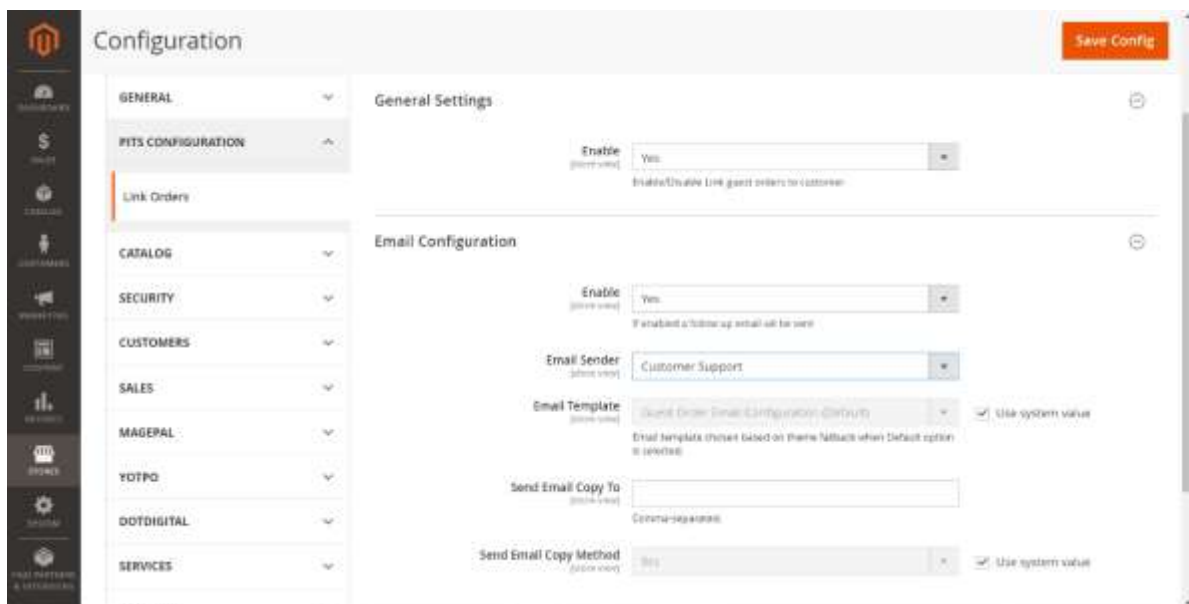

From the admin backend, go to **Stores** > **Configuration**>**PITS Configuration > LinkOrders**

Select **Yes** in the **Enable** dropdown option to enable the extension.

We can enable follow-up email for guest orders which asks customers to register. Select **Yes** to enable send follow-up email in the **Enable** dropdown option.
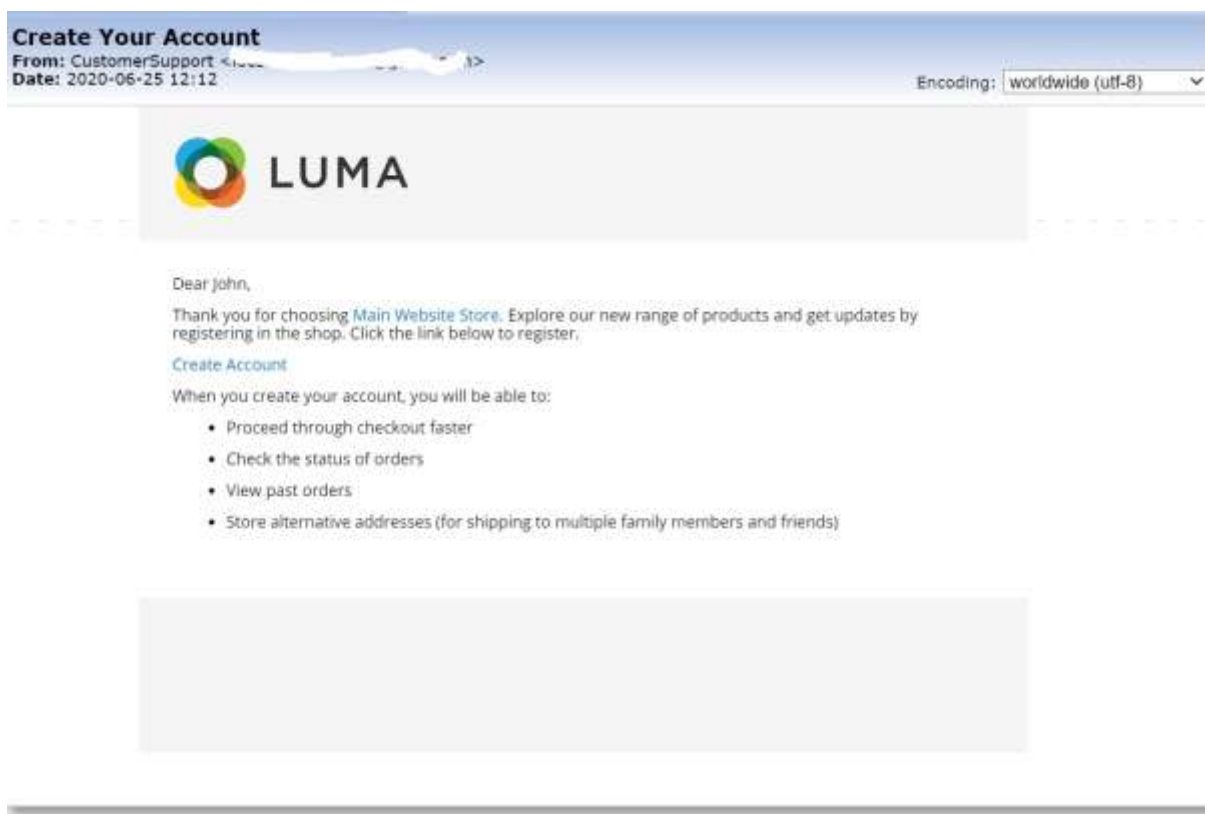

Select email sender from which follow-up emails needs to be sent from the **Email Sender** option.

Select email template for follow-up emails to be sent from the **Email Template** option.

Enter email address to which you want to send the copy of follow-up email from the **Send Email Copy To** option. In case there is more than one email, use comma to separate them.

Select copy email method from **Send Email Copy Method**. i.e. Bcc or separate email.

Click **Save Config** and clear the cache. That's it.

All guest orders created with the customer email will be mapped to the customer when creating customer from frontend OR backend.

Resource access control for admin users can be done for Link Order configuration.

Go to **Admin** > **System** > **User Roles**
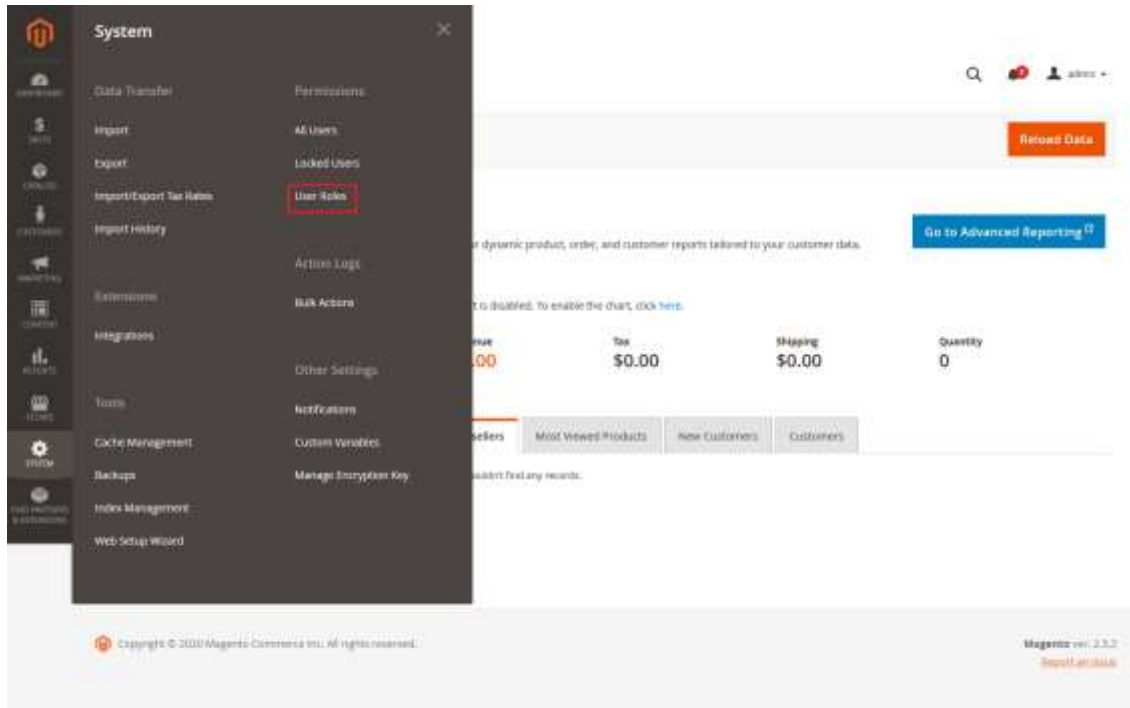

Add a new role resource

Select **LinkOrders role** at Role Resources section.
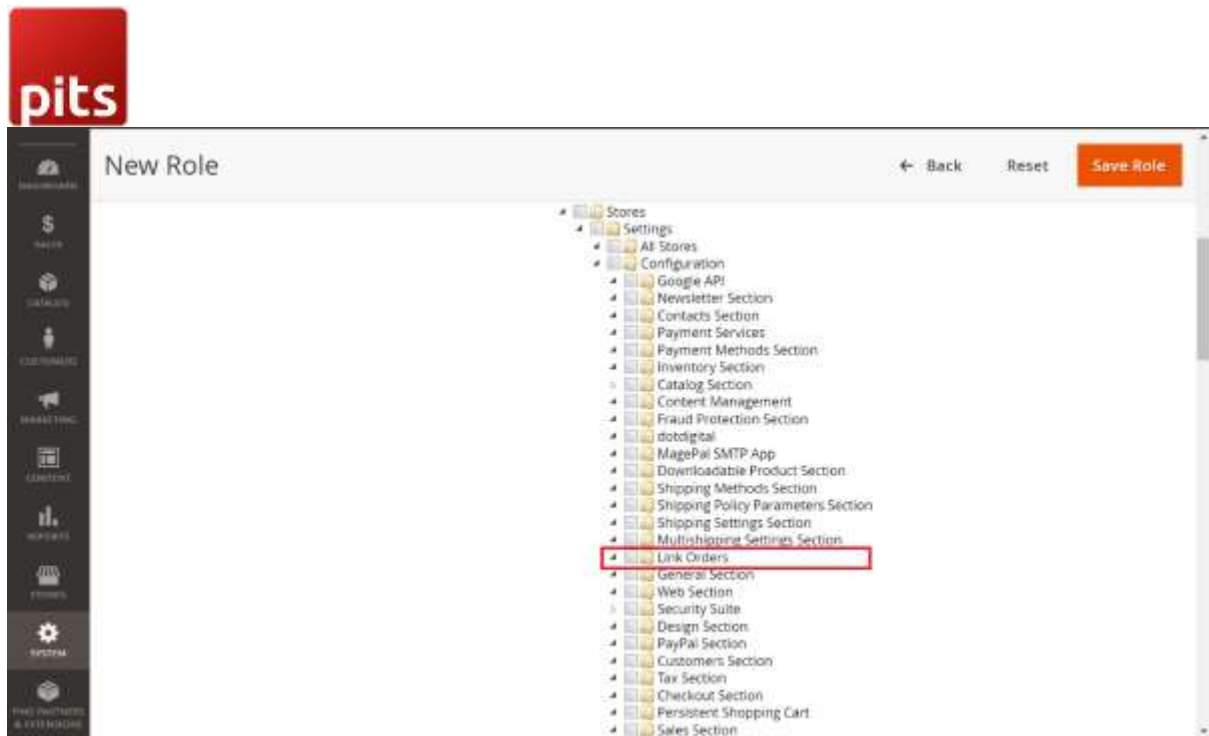

Set role users for admin accounts, thin click on Save Role to finish.
