1. Introduction

LuxeWood - Furniture Theme is crafted to elevate online furniture and interior décor stores. Designed with aesthetics, performance, and user experience in mind, it delivers a clean, modern layout that highlights products beautifully while ensuring seamless navigation and fast loading speeds.

With engaging homepage sections and optimized product displays, the theme enables businesses to showcase sofas, tables, lighting, décor, and complete interior collections in a visually compelling way. Its fully responsive design guarantees a flawless experience across desktops, tablets, and mobile devices, providing the flexibility and elegance needed to create a professional, conversion-focused online store.

2. Features

- **Responsive Design:** Fully responsive layout that seamlessly adapts to all screen sizes and devices, delivering a consistent and elegant experience across desktops, tablets, and mobile phones.
- **E-Commerce Ready:** Built to integrate smoothly with Odoo's eCommerce framework, the theme includes dedicated product showcase layouts and optimized cart functionality for a refined shopping experience.
- **Custom Components:** Includes a variety of pre-built, reusable blocks designed for effortless drag-and-drop customization.
- **Modern & Elegant UI:** Designed with a clean, contemporary aesthetic that enhances product presentation and strengthens brand identity.
- **Advanced Product Display:** Hover effects, and structured product sections help showcase items in a visually engaging and organized manner.

3. Install and Set Up the Theme

Installation

The installation procedure depends on whether Odoo is hosted **on-premise** or on **Odoo.sh**.

3.1. On-Premise Installation

Copy the following modules to an Odoo custom addons directory: *theme_furniture* and *website_furniture*.

For example: */opt/odoo19/custom-addons/theme_furniture & /opt/odoo19/custom-addons/website_furniture*

The custom addons directory must be included in the Odoo *addons_path*.

Important: Do not rename the *theme_furniture* and *website_furniture* directories.

3.2. Odoo.sh Installation

The installation procedure on Odoo.sh is different from an on-premise Odoo installation.

Step 1 – Add the Plugin to the Odoo.sh Git Repository

Add the *theme_furniture* and *website_furniture* modules to the Git repository connected to your Odoo.sh project.

Step 2 – Commit and Push the Changes

Commit both the *theme_furniture* and *website_furniture* modules to the Git repository.

For example:

```
git add theme_furniture/ website_furniture/
```

```
git commit -m "Add LuxeWood - Furniture Theme plugin"
```

```
git push
```

Step 3 – Wait for the Odoo.sh Build

After the changes are pushed, Odoo.sh creates a new build.

Wait for the build to complete successfully before installing the Odoo module.

If the build fails, review the Odoo.sh build logs and Python package installation logs to identify the dependency causing the failure.

3.3. Set Up the Theme

1. Open the Odoo.sh environment.
2. Log in to Odoo with administrator privileges.
3. Enable **Developer Mode**.
4. Go to **Apps**.
5. Click **Update Apps List**.
6. Navigate to **Website** → **Editor** → **Edit** → **Theme Tabs** → **Website Section** → **Switch Theme** and select **Furniture Theme**.
7. The dependency module **Furniture Theme Snippets** will be installed automatically.

Pick a Theme

Don't worry, you can switch later.
