

Bestseller Products

Product specification

The Bestseller Products extension for Magento 2 has been developed by PIT solutions which display your store's top selling products. This block can be added on the homepage and other pages. This functionality can be enabled or disabled for each store from admin. You only need to add a block of code in cms page.

Using this extension, you can show bestseller products automatically by using the configuration "Show Bestseller products Automatically" to Yes. If you make this configuration to No, then you can add the products id in the "Enter Product ids" field. These given products will show as bestseller products. The first 5 products will show on the bestseller grid. You can also enable view all, then a button link will show at the bottom of the gird. On that page, will display the first 20 bestselling products. Please make sure that cron is working correctly on your store. The bestseller statistics are refreshing via cron on a daily basis. You can also refresh the statistics then select the bestsellers and submit.

With this extension, customers can easily browse and buy products that are already proven to be popular with other shoppers, increasing the chances of a successful sale. Store owners can also use the data provided by the extension to make informed decisions about their inventory and marketing strategies.

The Bestseller Products extension for Magento 2 is a valuable tool for any online store owner looking to improve their sales and customer experience.

Features

- You can easily enable/disable this extension from the admin panel.
- Automatically show top ordered products
- Can easily add bestseller products in any cms pages.
- Only need to add a block of code in cms content section {{block class="Pits\ BestsellerProducts\Block\BestsellerProduct" template="Pits_BestsellerProducts::bestseller.phtml" cacheable="false"}}
- Admin can add products as bestseller products
- No coding is required to use this extension
