

ChatGPT AI Product Content Generator for Magento 2

1. ChatGPT

If you ever get stuck writing product descriptions or are overwhelmed by writing descriptions for too many products, our module can help you write product descriptions instantly with the click of a button. And it is not just random content, it is the kind that can convert e-window shoppers into repeat customers.

ChatGPT AI Content Generator for Magento 2 is a Magento 2 extension developed by PIT solutions which is used to generate content from magento backend product form with the help of chatGPT chatbot by open AI.

2.Features

- The content will generate when admin user clicks on **Generate Content with ChatGPT** button.
- Easily connect OpenAI GPT 3 with Magento 2 using the API key.
- In the backend product add/edit form, to generate content in description/short-description attributes, prompt to ChatGPT is generated based on product's name by default.
- Option to automatically set any product attribute values in the content generation prompt.
- Prompt for the ChatGPT will be automatically generated based on the attribute labels and values in the store scope.
- The admin can add a short description of the product with the **Generate Content with ChatGPT** option.
- The admin can add a product description using the page builder with **Generate Content with ChatGPT** option.
- The admin can add the product description and short description even if the page builder is disabled.
- Admin can add content for CMS Pages and Blocks with **Generate Content with ChatGPT** Option.
- Admin can add content for category with **Generate content with ChatGPT** Option.

- By default, content generation based on title or category name in CMS and Categories.

3. Configuration

Stores -> Configuration -> Pit Configuration -> Chat Gpt

Enable: Enable/Disable extension,

Title: You can give prompt instructions to ChatGPT using the **TITLE** field.

ChatGPT API Key: The key used to connect open AI.

Product Attribute: By default, content generation is based on this. If you add multiple attributes, you must keep one space between them. e.g.: {{name}} {{color}}

Attribute label and value is displaying based store view language

Note: If you don't follow correct format, you will never get auto input from product form

4. How to get Product Attribute code {{attribute_code}}

You can get product attribute code from Backend.

Heading 3 18px

Welcome to the Block Print Fit & Flare Dress!

The perfect combination of sophistication and style, the Block Print Fit & Flare Dress is the perfect outfit for a variety of occasions. This timeless dress is designed with intricate block print patterns in shades of black to create an elegant look. The fitted bodice and flared skirt create an ultra-flattering silhouette that accentuates your figure perfectly.

This beautiful dress features a V-neckline, 3/4 length sleeves and a concealed zipper at the back for easy access. It's made from a lightweight and breathable fabric for all-day comfort, making it the perfect choice for any occasion. Whether you are headed to the office or out for a special event, this dress will never let you down.

When it comes to chic style, the Block Print Fit & Flare Dress is the perfect pick! Be sure to add this stunning piece to your wardrobe today!

POWERED BY TINY

Click on **Generate Content with ChatGPT** button to generate content

The popup will display when clicking on the **Generate Content with ChatGPT** button and content will generate automatically based on your product name by default. You can change this from backend configuration to show any attribute value when the popup is loaded.

If you wish to change the prompt, you can change the prompt text and generate with “Generate” button in the pop-up

The prompt will be generated automatically based on store language.

The attribute labels and values given based on the store will be taken when store scope is switched in the backend.

The screenshot shows the product configuration interface for 'Joust Duffle Bag'. The 'Scope' dropdown menu is highlighted with a red box and is currently set to 'German'. The page includes a sidebar with navigation options such as Dashboard, Sales, Catalog, Customers, Marketing, Content, Reports, Stocks, System, and Find Partners & Extensions. If you are disabling page builder from **STORES->Configuration->Content Management->Advanced Content Tools**, the button to generate AI content will be as in the below image.

The screenshot shows a 'Contact us info' modal window. At the top, it says 'Generate AI Content'. Below this is a text input field containing 'Contact us info'. To the right of the input field are three buttons: 'Cancel', 'Generate', and 'Apply'. Below the input field is a text area containing the generated content: 'If you have any questions or inquiries regarding our services, please contact us at info@example.com or call us at (555) 555-5555.' The background shows a sidebar with navigation options like Dashboard, Sales, Catalog, Customers, Marketing, Content, Reports, Stores, System, and Find Partners & Extensions.

8. Catalog-> Catagories

Navigate to backend **Catalog-> Catagories** section.

The screenshot shows the 'Catalog' section of a backend system. The left sidebar has 'Categories' highlighted. The main content area shows a 'Reload Data' button, a 'Go to Advanced Reporting' button, and a summary table with the following data:

Revenue	Tax	Shipping	Quantity
\$0.00	\$0.00	\$0.00	0

Below the summary table, there are tabs for 'Bestsellers', 'Most Viewed Products', 'New Customers', and 'Customers'. The 'Bestsellers' tab is active, showing a table with the following data:

Items	Total
1	\$34.00
1	\$0.00
1	\$29.00

A message below the table states: 'We couldn't find any records.'

Click on **Apply** button in the above screen shot to set AI content.

If you are disabling page builder from **STORES->Configuration->Content Management->Advanced Content Tools**, the button to generate AI content will be as in the below image.

Default organization

You can copy the API key from here with the help of copy button.

The screenshot shows the 'API keys' page with a modal dialog titled 'API key generated'. The dialog contains the following text: 'Please save this secret key somewhere safe and accessible. For security reasons, you won't be able to view it again through your OpenAI account. If you lose this secret key, you'll need to generate a new one.' Below the text is a text input field containing the secret key 'sk-...buQB' and a green copy icon button. An 'OK' button is located at the bottom right of the dialog. A green notification banner at the top of the page reads 'API key generated! x'. The background shows the same table of API keys as in the previous image, with the first row highlighted.

Paste the API key in the corresponding field.

This is an Integration with a Third Party Service. Other charges and fees may be required to use this extension on your Store. You can view the pricing for Open AI GPT models here at <https://openai.com/pricing>

In OpenAI, tokens serve as the fundamental components of text that language models work with. Tokens can be thought of as pieces of words. These tokens can be either full words or smaller units like sub-words, each assigned a distinct numerical representation. Language models rely on these numerical representations to process and generate text. Essentially, when you feed text into a language model, it dissects it into tokens, examines them, and utilizes this information to generate a response.

10. Technical Requirements / Compatible with:

Magento Community 2.4.x

11. Installation

To install the module, follow the steps below.

Step 1: Download the module/extension and unzip it.

Step 2: Access your web server directories and upload the content of the folder into app/code/Pits/ChatGpt/ directory.

Step 3: Run the following commands to complete the installation.

1. Enable the module - php bin/magento module:enable

2. **Update of the database** - php bin/magento setup:upgrade
3. **Generate and pre-compile classes** - php bin/magento setup:di:compile
4. **Deploy static files** - php bin/magento setup:static-content:deploy

12. Supported Languages
