

Advanced Webapp

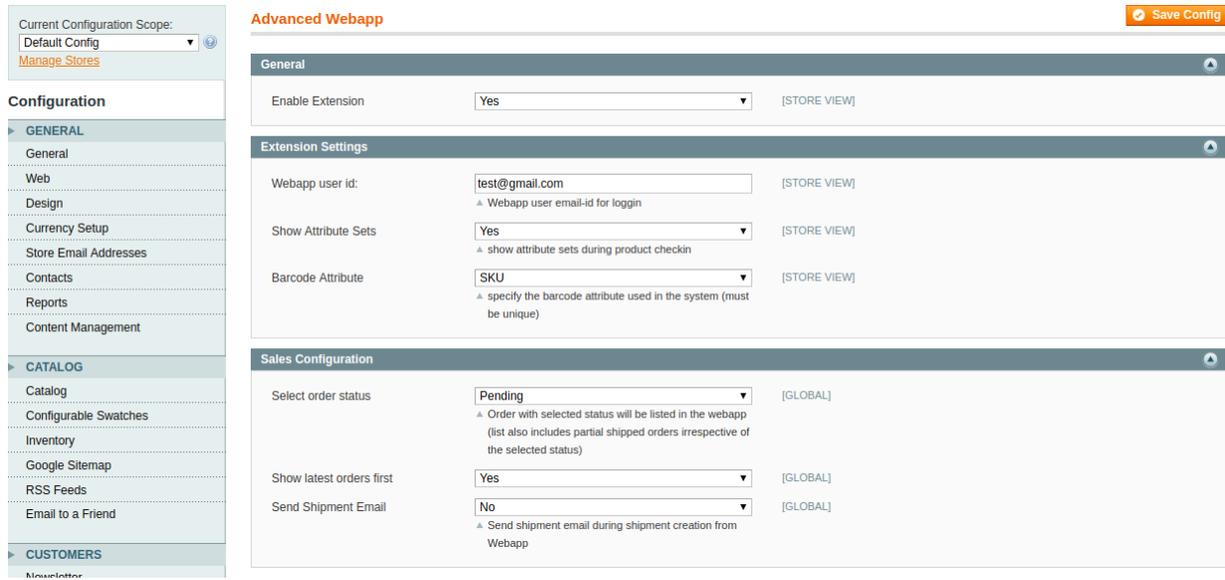

Product specification

Advanced Webapp extension gives ability to manage stock by racks of a warehouse. This will facilitate those people that has single warehouse where products are managed in rack system.

Features

- rack level stock management system
- fast check-in products to racks
- fast checkout products from racks
- attributeset selector for fast checkin products
- option to scan rack code or product code by mobilephone camera

Screenshots / Video

The screenshot shows the configuration page for the 'Advanced Webapp' extension. On the left is a navigation menu with categories like 'GENERAL', 'CATALOG', and 'CUSTOMERS'. The main area is divided into three sections: 'General', 'Extension Settings', and 'Sales Configuration'. Each section contains various settings with dropdown menus and checkboxes. A 'Save Config' button is located in the top right corner.
