

# Advanced ChatGPT AI Content Generator for Magento 2

# 1. Advanced ChatGPT AI Content Generator for Magento2

Advanced ChatGPT AI Content Generator is a Magento 2 extension developed by PIT solutions which is used to generate AI content from backend product form, category form and CMS page/blocks with the help of ChatGPT chatbot by OpenAI.

### 2.Features

- The content will be generated when click on 'Generate Content with ChatGPT' button.
- Easily connect OpenAI GPT-3, GPT-3.5, GPT-4, GPT-4o Mini, and GPT-4.1 with Magento 2 using the API key.
- By default, content generation is based on the product's name. But you can change the input from ChatGPT pop-up or using configuration.
- Option to enable/disable the extension from backend on store scope level.
- The admin can add description/short description of the product using the ChatGPT AI.
- Option to automatically set product attribute values in the content generation input.
- Input for the ChatGPT will be automatically generated based on the attribute labels and values in the store scope.
- The admin can add meta description of the product using the ChatGPT AI.
- With the help of mass action admin can add product short description and description for multiple products.
- The admin can add CMS page and Block content using ChatGPT AI.
- The admin can generate AI content for categories using ChatGPT AI.

#### 3. Configuration

Stores->Configuration->Pits Configuration->ChatGPT

	Scope: Default Config •				Save Config
DASHBOARD					
\$ SALES	GENERAL	~	General Settings		$\odot$
	PITS CONFIGURATION	^	Enable (store view)	Yes 💌	
CUSTOMERS	ChatGPT		API Secret	Enable/Disable ChatGPT.

	SERVICES	~	Product Meta Description Characters Limit [store view]	160	
	ADVANCED	~	Import Al Content Limit	Enter a numbet to limit Meta Description Characters maximum 255 chars.	Use system value
			[store view]	1000 Ferrer a number to limit import al context action. This applicable in case of bulk import in products grid.	Cos system range

- Enable: Enable/Disable extension.
- API URL: The URL which generates AI content.
- API Secret: Enter the API Secret key from the Open AI account.
- OpenAi Model: The ChatGPT model to generate AI content
- **Title:** You can instruct ChatGPTusing title, how you want the response type.
- **Product Attributes:** By default, content generation is based on this. If you add multiple attributes, you must keep one space between them. e.g.: {{name}} {{color}}.

Attribute label and value is displaying based store view language.

**Note:** If you don't follow the correct format, you will never get auto input from product form.

- **Product Meta Description Character Limit:** The character limit to generate AI content for product meta description.
- Import Al Content Limit: Enter the limit for bulk update in the product grid.

**Note:** Please enter an integer below 100 otherwise it will affect performance and also, you need more time to generate AI content.

### 4. How to get Product Attribute code {{attribute\_code}}

You can get product attribute code from Backend.

#### Stores -> Attributes - > Product

	2							
							Add N	ew Attribute
Search Reset Filter 66	records found					20	▼ per page <	1 of 4

This is an Integration with a Third Party Service. Other charges and fees may be required to use this extension on your Store. You can view the pricing for Open AI GPT models here at <u>https://openai.com/pricing</u>

In OpenAI, tokens serve as the fundamental components of text that language models work with. Tokens can be thought of as pieces of words. These tokens can be either full words or smaller units like sub-words, each assigned a distinct numerical representation. Language models rely on these numerical representations to process and generate text. Essentially, when you feed text into a language model, it dissects it into tokens, examines them, and utilizes this information to generate a response.

# 12. Technical Requirements / Compatible with:

Magento Community 2.4.x

### **13. Installation**

To install the module, follow the steps below.

Step 1: Download the module/extension and unzip it.

**Step 2:** Access your web server directories and upload the content of the folder into app/code/Pits/ChatGptPro/ directory.

**Step 3:** Run the following commands to complete the installation.

- 1. Enable the module php bin/magento module:enable
- 2. Update of the database php bin/magento setup:upgrade
- 3. Generate and pre-compile classes php bin/magento setup:di:compile
- 4.Deploy static files php bin/magento setup:static-content:deploy

### 14. Supported Languages

Backend texts having German, French, Spanish and Italian translations. ChatGPT is a multilingual chatbot that supports multiple languages. Currently, it supports more than 50 languages, including English, German, Spanish, French, Italian, Dutch, Portuguese, Russian, Chinese, Japanese, Korean, and many more.

All languages supported by GPT version models will be supported by this extension as well. Make sure the input is in the required language, and you will get the output in the specified language.

# 15. Change Log / Release Notes

Version 1.0.3 April 28, 2025

- Added models GPT-4, GPT-40 Mini, and GPT-4.1.
- Compatible with Magento Open Source (CE): 2.4.8.

#### Version 1.0.2 March 06, 2024

- ChatGPT model changed to "gpt-3.5-turbo-instruct".
- Compatible with Open Source (CE): 2.4.6-p4.

Version: 1.0.1: March 28, 2023

- Compatible with Open Source (CE): 2.4.6
- Import AI content
- Product meta description

Version: 1.0.0: Feb 23, 2023

• Initial release.
