ABOUT SAFERPAY

Saferpay is the easy, flexible, secure and the comprehensive e-payment solution from SIX Payment Services for easier and more secure payment in your online shop.

Worldline [Euronext: WLN] is the European leader in the payments and transactional services industry and #4 player worldwide. With its global reach and its commitment to innovation, Worldline is the technology partner of choice for merchants, banks and third-party acquirers as well as public transport operators, government agencies and industrial companies in all sectors. Powered by over 20,000 employees in more than 50 countries, Worldline provides its clients with sustainable, trusted and secure solutions across the payment value chain, fostering their business growth wherever they are.

SIX Payment Services has been part of Worldline since the end of 2018, making it Europe's largest technology partner for banks and merchants. The tailor-made solutions from SIX Payment Services include a broad portfolio of payment terminals and the acceptance and processing of national and international payments with credit, debit and prepaid cards as well as the smartphone.

ABOUT WORDPRESS PLUGIN

This plugin is implemented to integrate Saferpay Payment methods in Woocommerce. It supports the following payment methods of Saferpay to work with WooCommerce plugin.

- 1. VISA
- 2. MASTERCARD
- 3. MAESTRO
- 4. AMERICAN EXPRESS
- 5. BANCONTACT
- 6. DINERS/DISCOVER
- 7. JCB
- 8. BONUS CARD
- 9. SEPA ELV
- 10. MYONE
- **11.MASTERPASS**
- 12. UNIONPAY
- 13. PAYPAL
- 14.TWINT
- 15. PAYDIREKT
- 16. IDEAL
- **17.EPRZELEWY**
- **18. POSTFINANCECARD**
- **19. POSTFINANCE EFINANCE**
- 20. APPLEPAY
- 21. CREDITCARD (SAFERPAY FIELDS)
- 22. KLARNA PAYMENTS

This plugin supports all the features of online payment methods like payment capturing, refunding & cancellation. All these payment operations are done in the WooCommerce backend & will be synced to Saferpay account also.

Worldline / IX Payment Services

REQUIRMENTS

To install and configure Saferpay plugin in WordPress, the following is required:

- WordPress (5.0 to 5.6.1 and 5.6.2) and WooCommerce (tested 3.9 to 5) plugin.
- License for Saferpay.
- A valid Saferpay account with at least one active Saferpay terminal through which payments can be carried out.
- API credentials like Terminal ID, Customer ID, JSON Username and JSON Password for the Saferpay Live- and/or Test environment.
- Valid acceptance agreement for payment methods.

INSTALLATION

To install Saferpay Plugin, follow the steps below.

Step 1: Download Saferpay plugin ZIP package.

Step 2: Go to WordPress admin dashboard and visit Plugins » Add New. After that, click on the 'Upload Plugin' button on top of the page.

Step 3: Then a plugin upload form will appear. Here you need to click on the 'Choose File' button and select the plugin file you downloaded earlier.

Step 4: After you have selected the file, you need to click on the 'Install Now' button.

WordPress will now upload the plugin file from your computer and install it for you. You will see a success message after the installation is finished.

Add Plugins Upload Plugin		
	If you have a plugin in a .zip format, you may install it by uploading it here.	
	Choose File No file chosen Install Now	

Step 5: Once installed, you need to click on the Activate Plugin link to start using the plugin.

Manual installation via FTP

In rare cases, your WordPress hosting provider may have file restrictions that could prevent you to install a plugin from the admin area. In this situation, best way is to install the plugin manually using FTP.

First you will need to download the plugin's source as zip file. Next, you need to extract the zip file on your computer. Open the FTP client on your computer and connect to your website using the login credentials provided by your web host. Once connected, you need to go to the /wp-content/plugins/ folder on your website, and then upload the extracted plugin folder to that path.

After uploading the files, you need to visit the WordPress admin area and click on the Plugins link in the admin menu. You'll see Saferpay plugin successfully installed on the plugins page. You need to click on the Activate link below the plugin to start using it.

After successfully installing the plugin, you can either enable test mode or live mode

SAFERPAY TEST ACCOUNT

Saferpay offers the possibility to test all interfaces especially for your created test account.

The Saferpay test account allows you to implement Saferpay into your system and make test transactions over several payment simulators before going live.

https://www.six-payment-services.com/en/site/e-commerce-

developer/testaccount.html

Test mode configuration

We need to enter the provided test credentials into Saferpay settings:

$Menu \rightarrow Settings \rightarrow Saferpay Settings$

Initially, enable test mode and we need to enter the provided test credentials into Saferpay settings:

Required Data:

- **Test-Customer ID** •
- Test-Terminal ID (eCommerce Terminal). •
- Test JSON API username. •
- Test JSON API password. •

Live mode configuration

Appearance	1. Change operation	mode to "Live mode"
😰 Plugins 6	Live API Base URL	https://www.saferpay.co
👗 Users		The live API base url given by the Saferpay.
🗲 Tools	Live Customer ID	2. 24xxxx
∔† Settings		Get your live customer id from Saferpay backend.

	Cancel	BUY

CONFIGURATION

Saferpay Plugin configuration includes two section

- 1.Saferpay general settings
- 2. Payment method specific settings

SAFERPAY GENERAL SETTINGS

Configure general Saferpay settings from Menu \rightarrow Settings \rightarrow Saferpay Settings

The following configurations are available in Saferpay basic settings

- 1. Enable Test Mode: It defines the Saferpay Operation mode. If it is enabled, it allows the payment gateway to work in test mode by using test API keys otherwise it will work as live mode. By default, test mode is enabled.
- 2. Saferpay Licence: Choose the Saferpay licence you own. Saferpay has two licenses:
 - Saferpay eCommerce • access to :

Payment Page Interface

Saferpay Business • access to :

Payment Page Interface

Transaction Interface

Saferpay Fields and more

In case you have Saferpay Business without the corresponding license, the API will throw an error.

3. Test API Base URL: These fields already have default values of API base URL.

E.g.: https://test.saferpay.com/api. Note: Recommended not to change it in ideal case. Changes applicable only if there is an update in base test url from Saferpay side.

- 4. Test Customer ID: Enter your test customer id given by Saferpay while creating a partner account in Saferpay.
- 5. Test Terminal ID: Enter your test terminal id given by the Saferpay.
- Test JSON Username: Enter test JSON username given by the Saferpay 6.
- 7. Test JSON API Password: Enter test JSON API password given by Saferpay. To get JSON API username and password you have to login to Saferpay management interface and go to Settings -> JSON API basic authentication. https://www.six-payment-services.com/en/site/e-commerce-Please refer developer/integration.htmland https://saferpay.github.io/sndbx/index.html#terms for more information.
- 8. E-Mails: Saferpay will send an email to the address specified in this field. You can add multiple emails separated by a comma. It is not a mandatory field.
- 9. Check Extra Level of Authentication: Recommended for high risk businesses (Jewellery, Electronics, etc.) to stick to the highest level of security. Else you can have it as "No, I don't want extra level of authentication."
- 10. Liability Shift Behavior: This field determines how to handle the transactions if a fraudulent card is used on the website. When we use this functionality, the liability shifts to the authorizing bank and the store owner receives no claim for any chargeback. It has two options:

- Option A:" If no liability shift has been granted transaction will be on-hold, merchant can capture or cancel transaction". Here order placed via fraudulent card will be on-hold and merchant can capture or cancel transaction accordingly.
- Option B: If no liability shift has been granted transactions will be auto cancelled. Here order placed via fraudulent card will be cancelled.
- 11. Payment Page CSS URL: Enter a valid CSS URL which is included in the payment page. This file must be hosted on an SSL/TLS secured web server (the URL must start with https://) Example: https://merchanthost/merchant.css. Refer https://saferpay.github.io/sndbx/CssiFrame.html for more details.
- 12. Description of the order: A human readable description provided by the merchant that will be displayed in Payment Page.
- 13. Payment Page Configuration Name: Here you can define the payment page configuration name. The configuration can be created from Saferpay Backoffice ('Settings > PaymentPage Configuration'). If the configuration is not found by in Saferpay (setting / Backoffice); the default configuration will be used.

🔞 🖄 Saferpay V2 🔸	ⓒ 9 🛡 0 井 New English	Hawdy, ship:	admin 🔽 📍
 Pages Comments 	Live API Base URL	https://www.saferpay.cl The live API base ut given by the Saferpay.

🖆 Plugins 🚯				

- 13. Authorization Method: Here you can set authorization method used for payment processing. Two options are available under these settings.
- a. Payment Page During the order processing the user will be redirected from the WooCommerce shop to the Saferpay payment gateway interface to process the payment. On successful completion of the payment the user will be redirected back to the WooCommerce shop. The Saferpay Payment Page Interface is intended for a simplified and universal integration of the payment process by using the PaymentPage form. The Saferpay PaymentPage can be used both with a Saferpay eCommerce license and with a Saferpay business license. All Saferpay supported payment methods can be processes with the Payment Page Interface.
- b. Transaction Interface (Widget Authorization) During the order processing the user is served with Saferpay payment forms in a pop up within the WooCommerce shop. The Transaction Interface is an extension to PaymentPage Interface. It offers the Hosted Entry Form (HEF) to process

card payments seamlessly. This interface can also be used in combination with Secure Card Data to store/tokenize payment data during the payment process. The Transaction Interface is only for holders of a business licence on the live system.

SAFERPAY KLARNA PAYMENTS

Other than general settings, some additional settings need to be configured to use Klarna payment methods.

In Saferpay Back office under Settings > Terminals. Please select the terminal you want Klarna activated on and scroll down to Self Service. Please refer the link below

https://saferpay.github.io/sndbx/KlarnaPayments.html

This service handles differently, depending on the Saferpay environment (test/live) you are on, so please pay close attention.

You'll have two options Klarna and additionally, on the Saferpay test environment, Klarna Simulator. For Live mode configure Klarna. For test mode configure Klarna Simulator

Self servi	ce			
	Provider	Payn	nent Page

Additionally, Klarna will be displayed on the country-currency combination pair.

For e.g.: Submitting "CHF" for Switzerland as your Country Code, but selecting EUR as your currency, will cause Klarna to not be displayed!

SAFERPAY FEATURES

DESIGN CUSTOMIZATION

If you want to customize the default design of Saferpay interface, Saferpay provides the following options:

- 1. CSS-Styling: The CSS styling-options can be used over following methods.
 - Payment page
 - Transaction Interface
 - Alias Insert •

Note: The CSS file that is referenced by the CssUrl parameter must be stored on a web server that supports HTTPS.

Refer https://saferpay.github.io/sndbx/CssiFrame.html#css-usecss for detailed information.

- 2. Theme: This parameter let you customize the appearance of the displayed payment pages. By default a lightweight responsive styling will be enabled. If you don't want any styling please choose 'NONE'.
- 3. Payment Page Configuration: You can create different PP configurations to be applied over Transaction initialize and PaymentPage Initialize. The configuration itself can be created inside the Saferpay Backend under "Settings > Payment Page Configuration".

Note: If a custom CSS is provided, any design related settings set in the payment page configuration will be overwritten and the default design will be used.

ORDER MANAGEMENT

Orders done by customers are displayed under WooCommerce \rightarrow Orders. Here you can view the list of all orders available.

TRANSACTION DETAILS

CAPTURE PAYMENT

In the payment configuration, if "Capturing" is set to "Auto Capture", merchant don't need to do anything from WordPress backend. Payments will be captured automatically by the system.

When the "Capturing" is set to "Manual Capture", merchant will have the option to Capture or Cancel transactions. If we click Capture, transaction will be captured.

For orders containing only digital products if payment is successful then status of that order will be "Completed"

CANCEL PAYMENT

Only authorized, but not captured orders can be cancelled. Cancellation of an order prevents any future change from being made to it. If we click CANCEL, transaction will be cancelled.

Worldline //IX

Payment Services

Order Details Transaction Tab with Capture/CANCEL button

While clicking Capture button, capture confirmation pop up will be displayed. If we click OK button, amount will be successfully captured and order status will be changed to Processing.

You can see transaction status and date under history tab mentioned in order detail page.

REFUND PAYMENT

Just like Saferpay transactions, you can also manage the Saferpay refund transactions. Saferpay refund will only be available if transactions are captured properly. If transactions are not captured click 'Capture' button available in transaction tab, then only Saferpay refund button will be enabled. Manual refund buttons are available all the time. Admin should have to do manual refund and update details in Saferpay back office manually. Refund is also available for orders having completed status.

For Saferpay Refund do the steps mentioned below

- 1. Capture order from backend
- 2. Then click Refund button

ALIAS MANAGER

Alias Manager allows your customer to save the credit card information in his account and to use for the future payments.

Saferpay Secure Card Data or SCD in short, is a service for saving sensitive payment means information in the certified Saferpay data centre. By using SCD, the payment data is separated from the merchant application and no longer comes in contact with it. The stored Secure Card Data can be referred from future payments initiated via Transaction" interface.

This feature is available for payment methods that supports secure card data. Sensitive payment data is stored only in certified Saferpay data centre. If the settings 'Is Save Card Available?' is Active in Payment method configuration page, then logged in customers can save and use their card for future transactions.
