1. Introduction

The **DeepL Translate** module is a powerful translation tool for Odoo that simplifies and automates the multilingual translation of business data. Seamlessly integrated with the DeepL translation service, it allows users to translate any translatable field directly within the Odoo interface, enhancing efficiency and consistency across languages.

2. Features

- **Seamless Integration:** The module adds a DeepL translation button to Odoo's standard translation dialogs, making it easy to translate fields without leaving the Odoo environment.
- **Automatic and Accurate Translation:** Utilizes DeepL's industry-leading neural machine translation technology for high-quality translations.
- **Supports Multiple Languages:** Pre-configured with all DeepL-supported languages and allows for custom language mapping and formality settings.
- **Saves Time and Reduces Errors:** Eliminates the need for manual copy-paste translation, reducing the risk of mistakes and speeding up the localization process.
- **User-Friendly Configuration:** API key and language settings are managed through Odoo's familiar settings interface.
- **Usage Monitoring:** Administrators can track DeepL API usage directly from the Odoo configuration panel.

3. DeepL Configuration

3.1 Sign Up and Setup

- **Create a DeepL API Account**

Sign up for a DeepL API account and register your application.

- **Access API Keys**

After logging in, go to the [API Keys & Limits](#) section in your DeepL account dashboard.

- **Configure Credentials**

Copy the API key and enter it in the Odoo configuration settings to connect your DeepL account with the module.

Figure 1: General Configuration

3.2 Configure DeepL in Odoo

a. Installation and Module Selection

- Install the **DeepL Translate Connector** module.
- Navigate to the module settings for configuration.

b. Use the API Key in Odoo

- Go to **Settings** → **Configuration** → **DeepL** section.
- Paste the API key in the designated field and save.

The screenshot shows the Odoo Settings interface. The top navigation bar includes 'Settings', 'General Settings', and 'Users & Companies'. Below this, there are buttons for 'Save', 'Discard', and 'Settings', along with a search bar. The main content area is divided into two sections: 'Users' and 'Languages'. The 'Users' section includes an 'Invite New Users' form with an 'Enter e-mail address' field and an 'Invite' button, and a 'Pending Invitations' section with a 'demo' button. The 'Languages' section shows '1 Language' and an 'Add Languages' button. On the right side, there is a 'DeepL Settings' section with an 'API Key' field, a progress bar showing '2 %', and a character count '97871 of 5000000 Characters'.

Figure 2: DeepL Account Configuration in Odoo

3.3 Language Setting

- Navigate to **Settings** → **Translations** → **Languages**.
- For each language, configure the following:
 - DeepL Source Language Code
 - DeepL Target Language Code

Figure 3: Source and target language

3.3.1 Language formality

Sets whether the translated text should lean towards formal or informal language. This feature currently only works for target languages DE (German), FR (French), IT (Italian), ES (Spanish), NL (Dutch), PL (Polish), PT-BR and PT-PT (Portuguese), JA (Japanese), and RU (Russian). The formality field will only appear for languages that support formality in DeepL.

- default (default)
- more - for a more formal language
- less - for a more informal language
- prefer more - for a more formal language if available, otherwise fallback to default formality
- prefer less - for a more informal language if available, otherwise fallback to default formality

DeepL Source Language Code [?]	FR
DeepL Target Language Code [?]	FR
Formality [?]	Default

Figure 4: Language Formality setting

3.4 Supported Languages

- The module includes default mappings for all DeepL-supported languages.
- You can edit these mappings in **Settings** → **Languages**.

Figure 5: Add Language

3.5 How to Use

The DeepL button appears in translation dialogs for any translatable field (e.g., product names, descriptions, etc.).

- Open a record (e.g., Product, Partner, etc.)
- Click the "Translate" link.
- In the dialog, a **DeepL icon/button** will appear next to each translatable field.
- Click the icon to auto-translate using DeepL.

The screenshot shows the Odoo Product form for 'Acoustic Bloc Screens'. The top navigation bar includes 'Sales', 'Orders', 'To Invoice', 'Products', 'Reporting', and 'Configuration'. The 'Product Variants' section shows '[FURN_6666] Acoustic Bloc Screens' with a 'New' button. The 'Print Labels' button is visible. The product name 'Acoustic Bloc Screens' is displayed with a star icon and a language dropdown set to 'EN'. Below the name, there are checkboxes for 'Can be Sold' and 'Can be Purchased'. The 'General Information' tab is active, showing details like 'Product Type' (Consumable), 'Invoicing Policy' (Delivered quantities), 'Sales Price' (\$295.00), 'Customer Taxes', 'Avatax Category', 'Cost' (\$287.00), 'Internal Reference' (FURN_6666), 'Barcode', 'Product Category' (All / Saleable / Office Furniture), and 'Product Template Tags'. A small image of the product is shown on the right.

Figure 7: Field Translation

3.6 Monitor API Usage:

- The module tracks your DeepL character consumption via the API.
- Navigate to **Settings** → **General Settings** → **Languages** to view:
 - A progress bar showing percentage of quota used.
 - Text indicating characters used vs. total quota.

Figure 8: API Usage

4. **Technical Requirements / Compatibility:**

- Compatible with Odoo v18 – both Community and Enterprise editions.

5. **Changes Log / Release Notes**

- Version 1.0.0: September 2025
 - Initial release.

6. **Support**
