1. Introduction

Typing search queries, especially on mobile devices, can be time-consuming and inconvenient for users. This can lead to reduced customer satisfaction and lower conversion rates. The Voice Search Plugin for Odoo aims to resolve this by offering a more seamless and user-friendly way to search products. By using voice commands, customers can search products more efficiently, resulting in improved shopping experiences and higher sales potential for e-commerce stores.

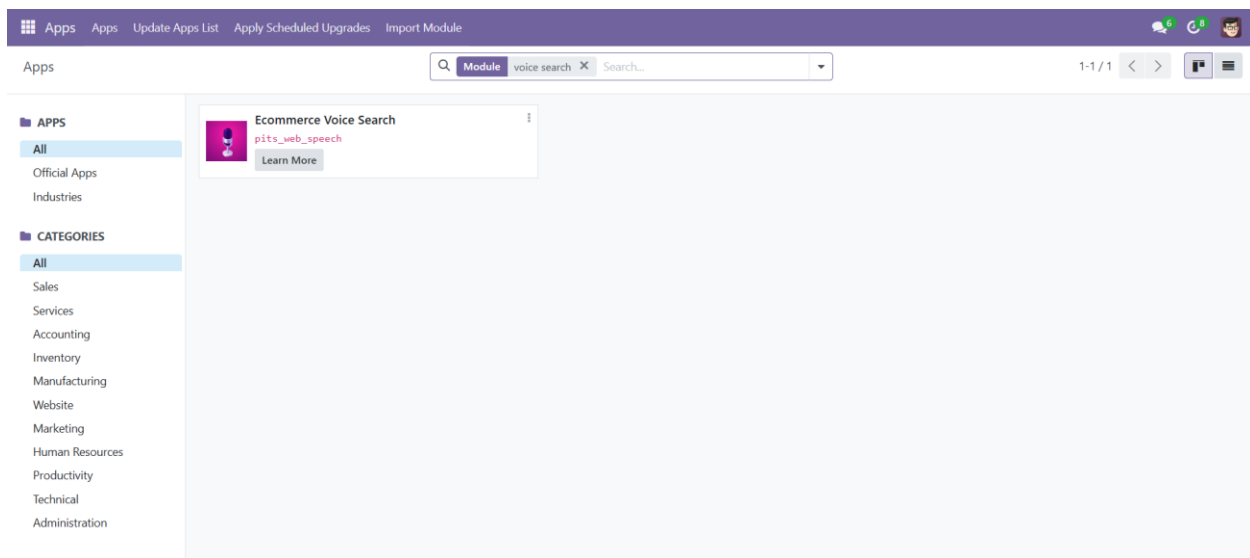

2. Features

- **Google Web Speech API Integration:** Converts voice input into text for a streamlined search experience.
- **Improved Shopping Experience:** By allowing voice-based searches, customers can browse products faster and more conveniently, especially on mobile devices.
- **Eliminates Typing:** Streamlines the search process by allowing voice input instead of typing.
- **Fast Results:** Voice search bypasses the delays often associated with text-based searches, offering quicker results.
- **User-Friendly:** A more intuitive search method, enhancing the overall user experience.

3. Working

i. Install the Voice Search Module

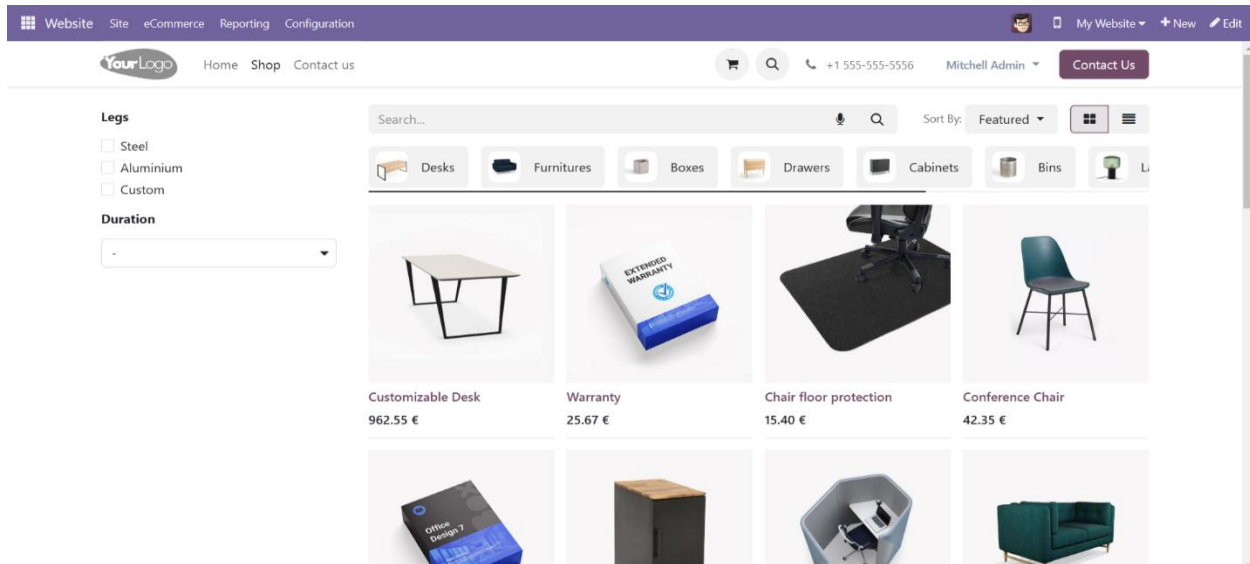

Install the plugin to enable voice search functionality on your Odoo e-commerce store.

Screenshot 1: E-commerce Voice Search module

ii. Activate Voice Search

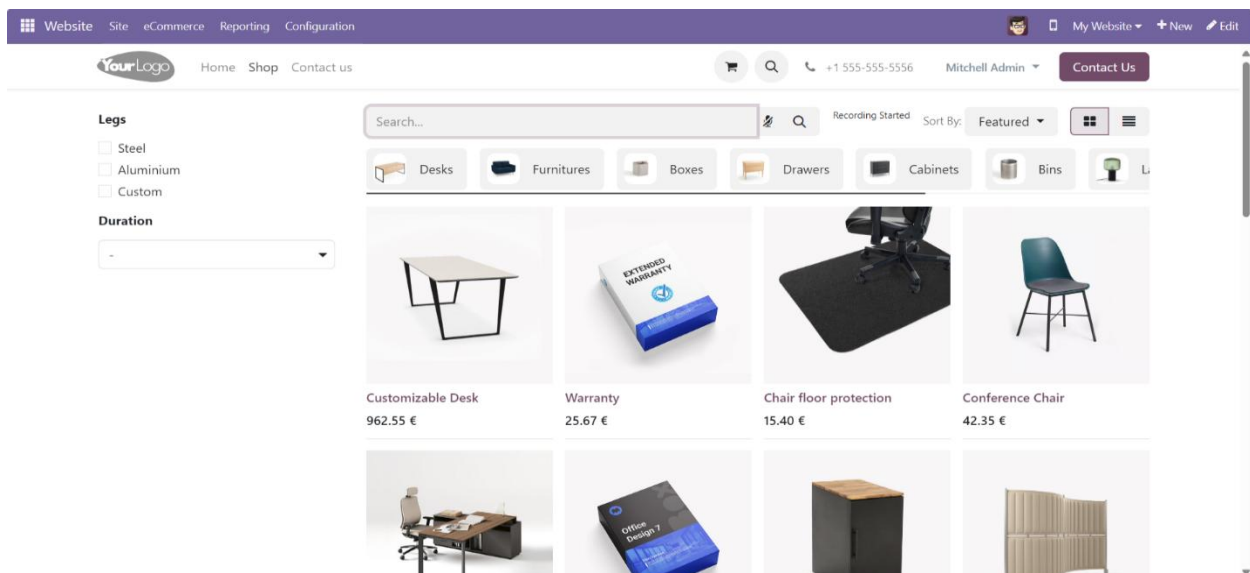

Click the microphone icon located in the search box on the e-commerce page to begin voice input.

Screenshot 2: E-commerce search with mic button

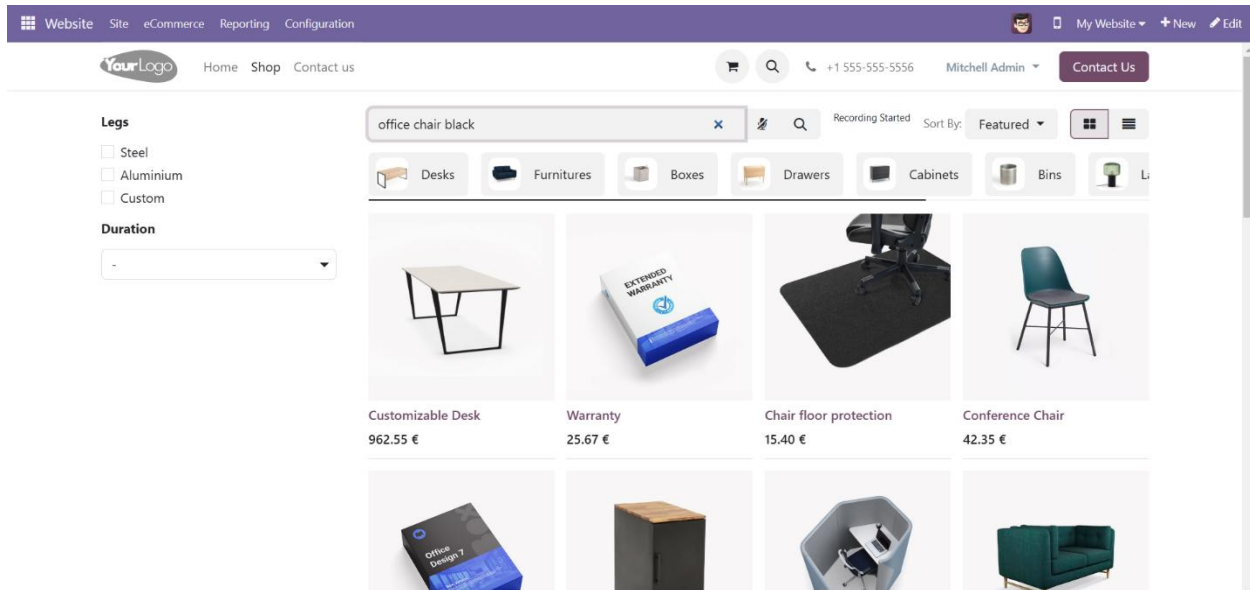

iii. Search Using Voice

- Verbally state the product or item you wish to search for.

Screenshot 3: Voice Search started

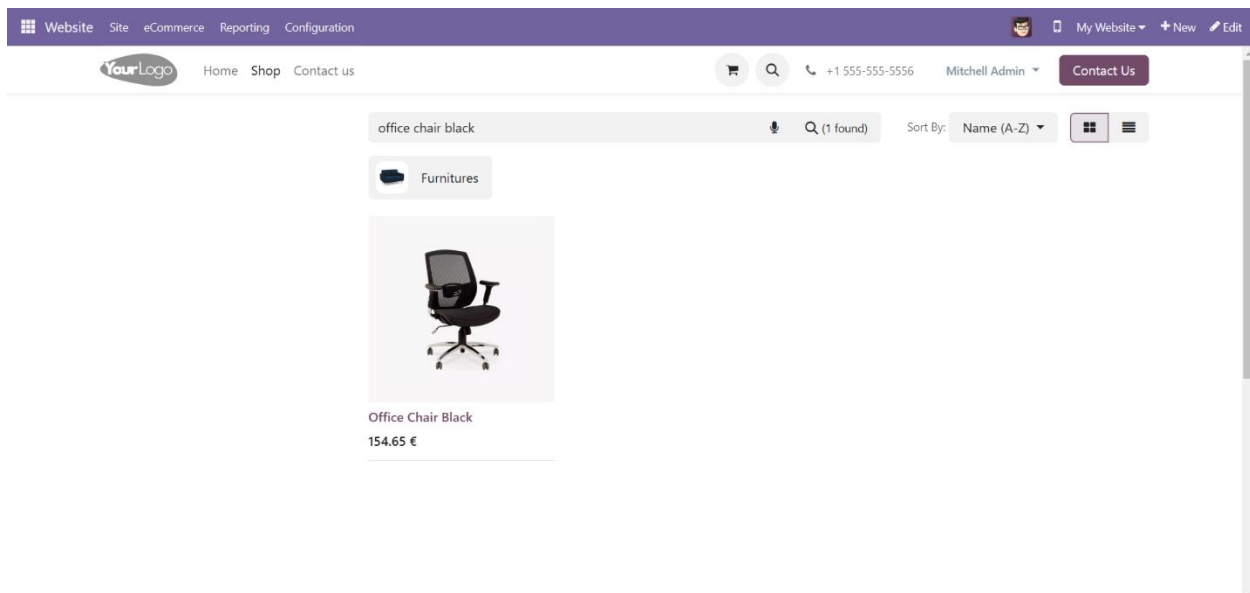

- Search will start automatically in 3 seconds, or you can press Enter/search button.

Screenshot 4: Product entered through voice

iv. Reset Search Input

- If you wish to reset the search, say "Reset," or click the "X" in the search box to clear the query.
