1. Introduction

The Theme Aroma is a premium, elegant, and modern Odoo website theme crafted for businesses especially those in the perfume and fragrance industry seeking a refined and luxurious online presence. With its sophisticated design, soft color palettes, and smooth animations, it enhances your brand identity and delivers a premium shopping experience to customers.

Built with the flexibility of Odoo Website Builder, this theme allows you to easily customize layouts, manage product collections, and showcase your perfumes with high-quality visuals, detailed descriptions, and scent categories.

2. Features

- **Responsive Design:** Fully responsive layouts that adapt seamlessly to all screen sizes and devices, ensuring a consistent and elegant experience on desktop, tablet, and mobile.
- **E-Commerce Ready:** Optimized for Odoo's eCommerce framework with dedicated product showcase layouts, quick view pop-ups, and smooth cart integration for a refined shopping experience.
- **Custom Components:** Includes pre-built, reusable blocks such as banners, product grids, fragrance collections, and promotional sections – easy to drag, drop, and customize.
- **Elegant Animations & Visuals:** Soft transitions, hover effects, and subtle animations enhance visual appeal while maintaining a luxurious and modern aesthetic.
- **Easy Customization:** User-friendly editor support to modify colors, typography, and layout effortlessly, allowing you to create a unique brand identity with minimal effort.

3. Install and Set Up the Theme

1. Log in to your Odoo instance.
2. Enable **Debug Mode**, then go to **Apps** → **Update Apps List**.
3. Navigate to **Website** → **Editor** → **Edit** → **Theme Tabs** → **Website Section** → **Switch Theme** and select **Theme Aroma**.
4. The dependency module **Aroma Theme Snippets** will be installed automatically.

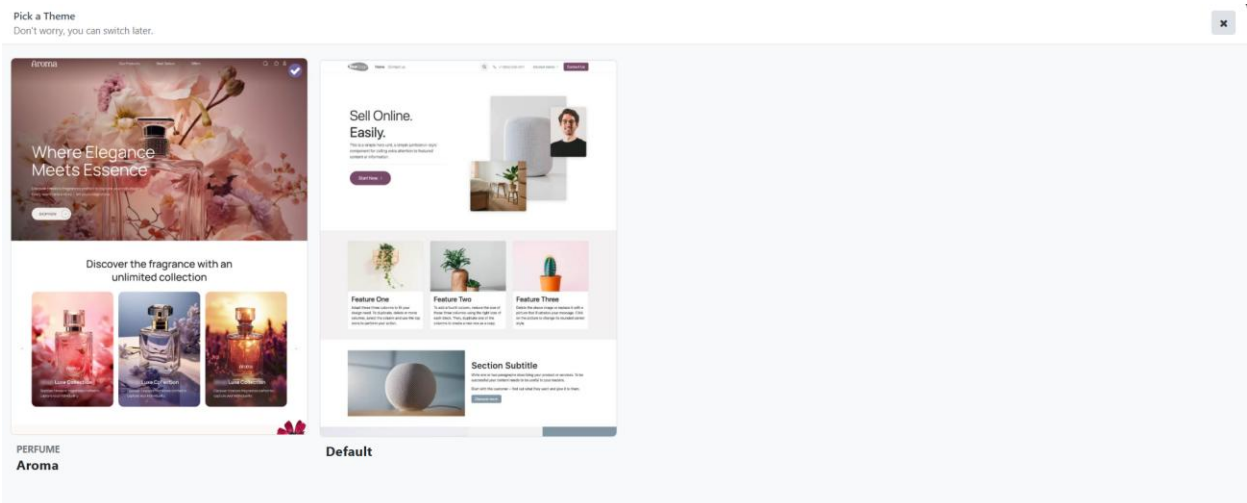

Figure 1 - Select Theme Aroma

4. Header Style

1. Go to **Website** → **Editor** → **Edit**, then click on the **Header** section.

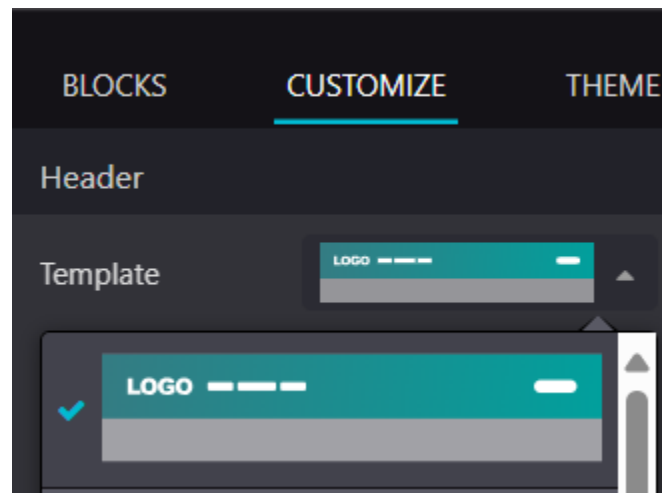

Figure 2- Header Template

2. Select the **Header Template** shown above.

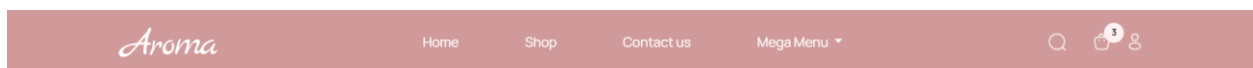

Figure 3- Aroma Header

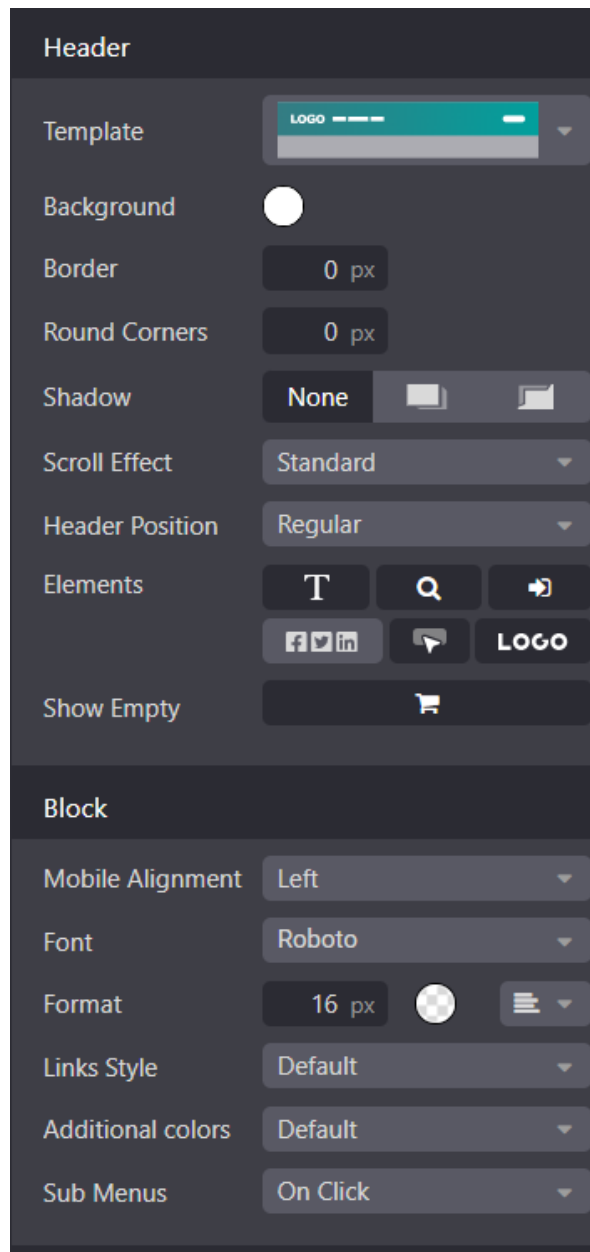

Figure 4- Header Customization

3. Choose the **Header Template**, **Placement**, and **Scroll Behavior**.
4. Customize the **Background**, **Border**, **Corners**, and **Shadow** effects.
5. Set the **Font Family**, **Font Size**, and **Link Styles** for the header text.
6. Adjust **Mobile Alignment** and **Submenu Behavior** as needed.

5. Mega Menu

- Go to **Website** → **Site** → **Menu Editor**, click **Add Mega Menu Item**, and fill out the popup form to create the menu.

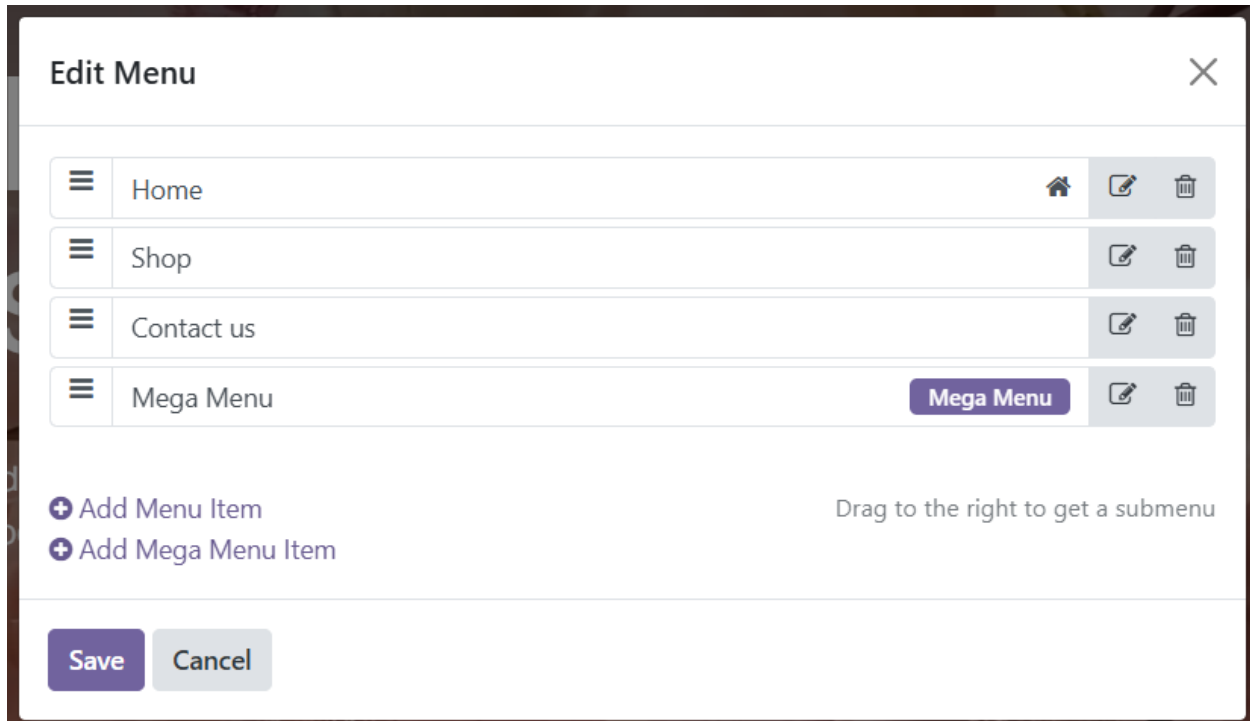

Figure 5 – Create Mega Menu

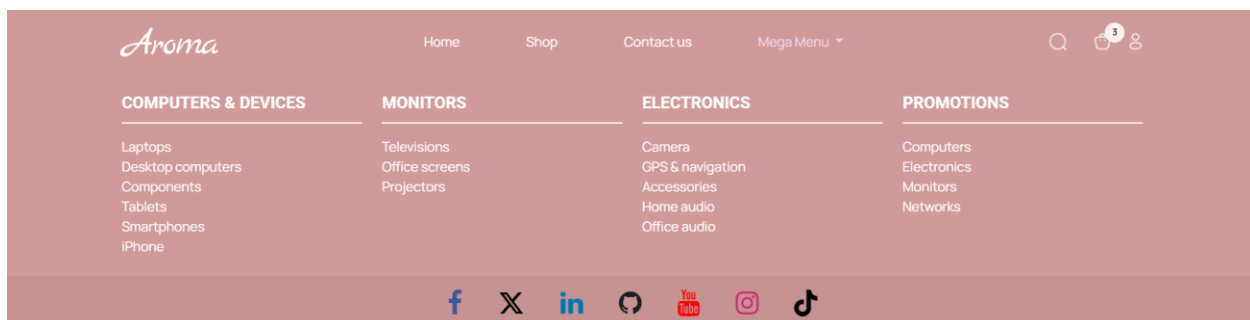

Figure 6 – Mega Menu

6. Theme Aroma Snippets

1. Go to **Website** → **Editor** → **Edit**, then click **Blocks**.
2. Drag and drop the required **Aroma Blocks** as needed.

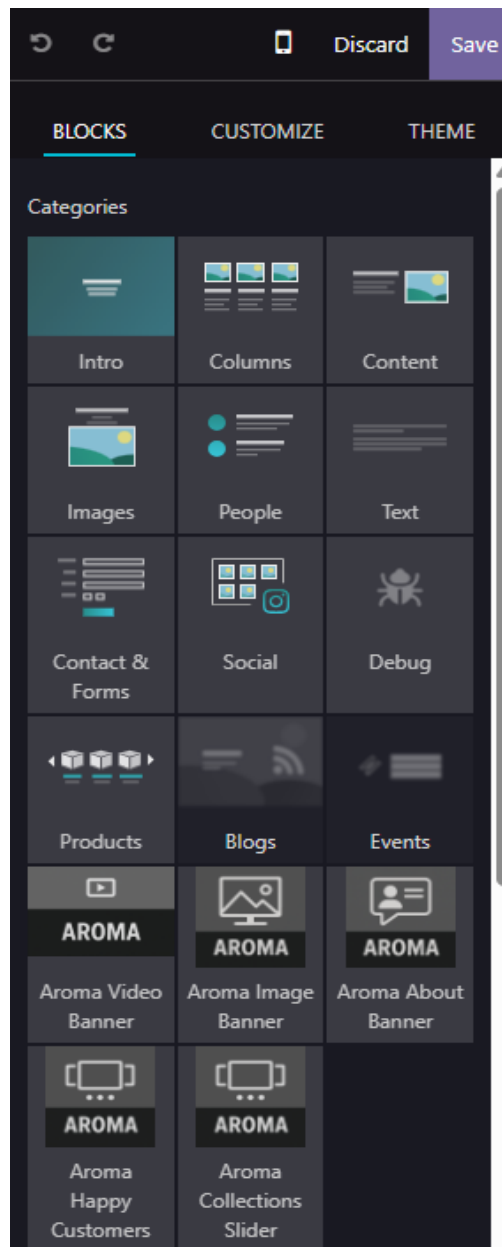

Figure 7 – Aroma Snippets

Notes:

- *Background videos in Odoo are rendered through **iFrames**, which limits direct control over their **height** and **scaling**. Videos smaller than their container may leave visible gaps, exposing the background image behind them. To ensure proper display, use videos that match the container's aspect ratio—preferably a standard 16:9 ratio for optimal compatibility.*
- *Certain sliders (such as **Aroma Collection Slider** and **Happy Customers Slider**) are powered by **Splide.js** for smooth and interactive transitions. In the **Odoo Website Editor**, these sliders may initially appear without **navigation buttons**, **spacing**, or **sliding effects**, as the required JavaScript initializes only **after the first save**. Once the page is saved, all scripts load correctly, and the sliders display with proper **spacing**, **transitions**, and **functional controls**.*
- *In the editor, you can adjust each block's **height** (Auto, 50%, 100%) and **width** (Small, Regular, Full). However, altering these may affect the layout due to **minimum spacing requirements**. It is recommended to keep **height as Auto** and **width as Regular** for optimal alignment and appearance.*
- *When using a **video banner**, it is advisable to use the **first frame of the video** as the **banner's background image**. This ensures a **smooth transition** and prevents flickering while the video loads.*

6.1. Aroma Video Banner

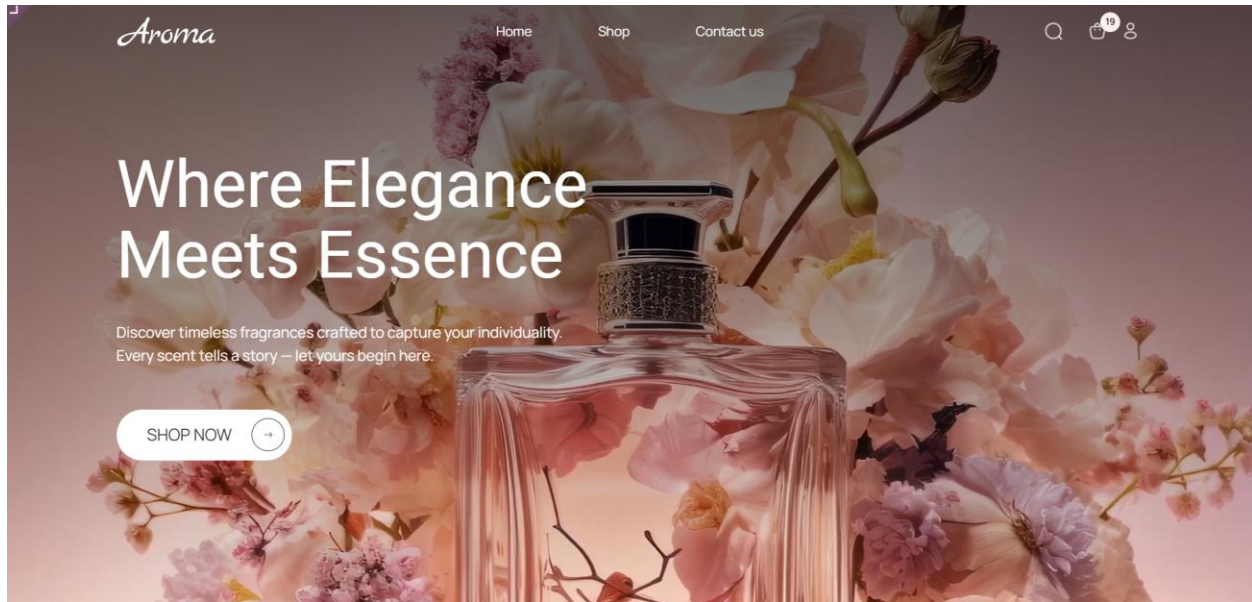

Figure 8 – Aroma Video Banner

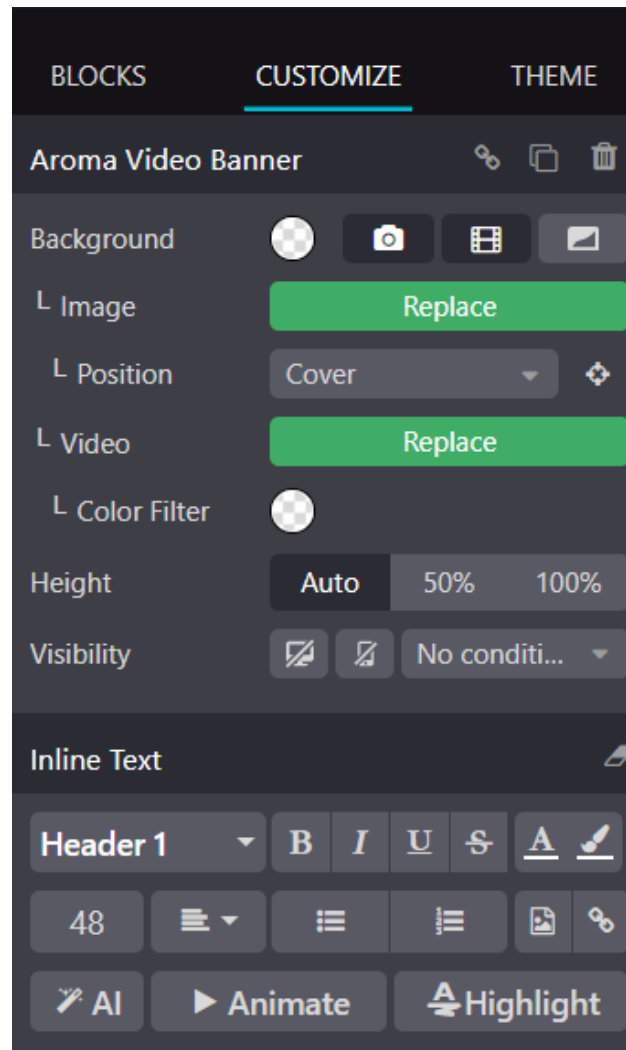

Figure 9 - Customize Video Banner

- Set a **background** using an **image or video** and apply **color filters** to adjust tone and overlay effects.
- **Replace** or **upload** new media and choose the **background position**.
- Control **banner visibility** by managing when and where it appears using **visibility conditions**.
- **Edit text** directly within the banner for quick customization.
- Add **animation** or **highlight effects** to create an engaging visual presentation.

6.2. Aroma Collections Slider

Discover the fragrance with an unlimited collection

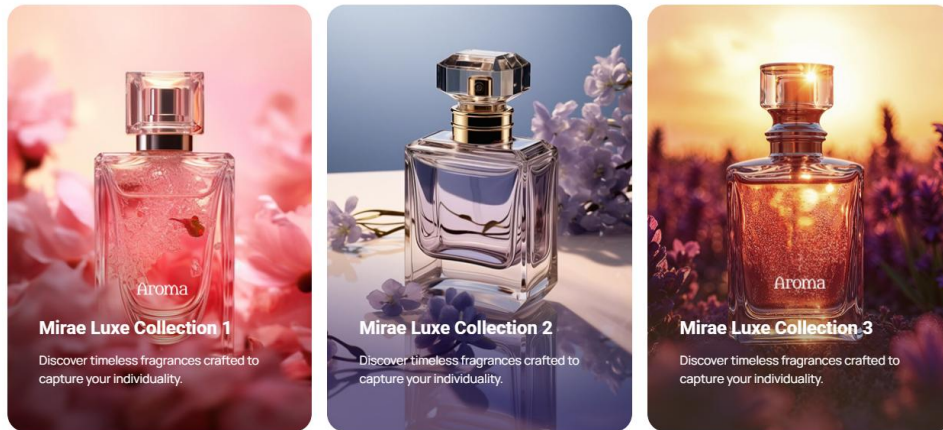

Figure 10 – Aroma Collections Slider

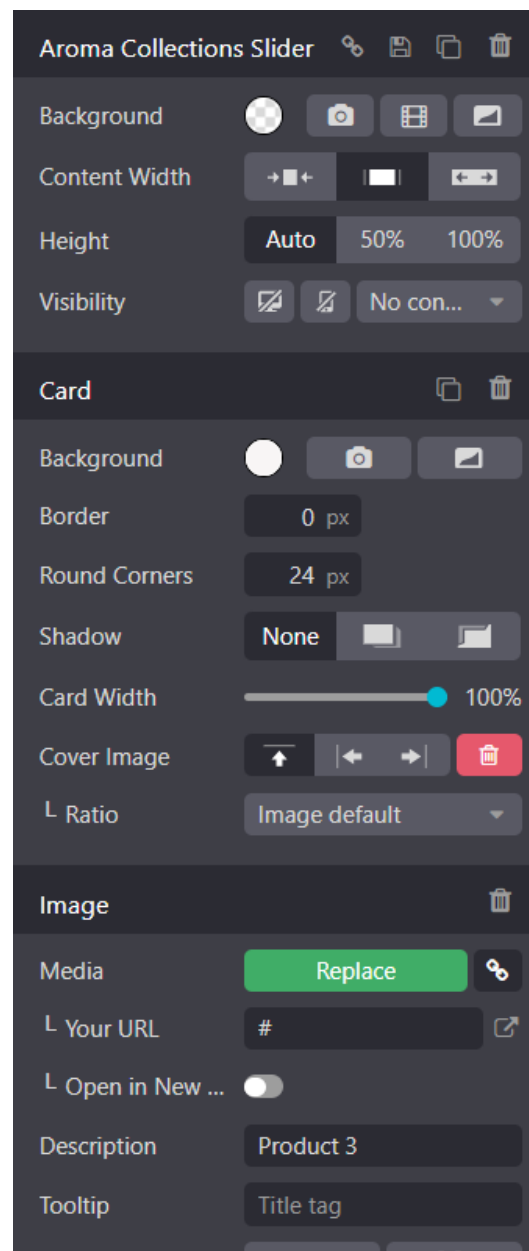

Figure 11 - Customize Aroma Collections Slider

- Customize the **slider background** using an **image**, **color**, or **video**, and configure **visibility conditions** as needed.
- Adjust the **content width** and **section height** to achieve a flexible and responsive design.

- Personalize each **collection card** by modifying its **background, border, corners, and shadow style**.
- Set **cover images**, control the **aspect ratio**, and manage **card width** for a consistent layout.
- **Replace media**, add **URLs**, and define whether links open in **new tabs**.
- Include **product titles, short descriptions, and hover tooltips** to enhance user interaction.

6.3. Aroma Image Banner

Figure 12 - Select Aroma Image Banner

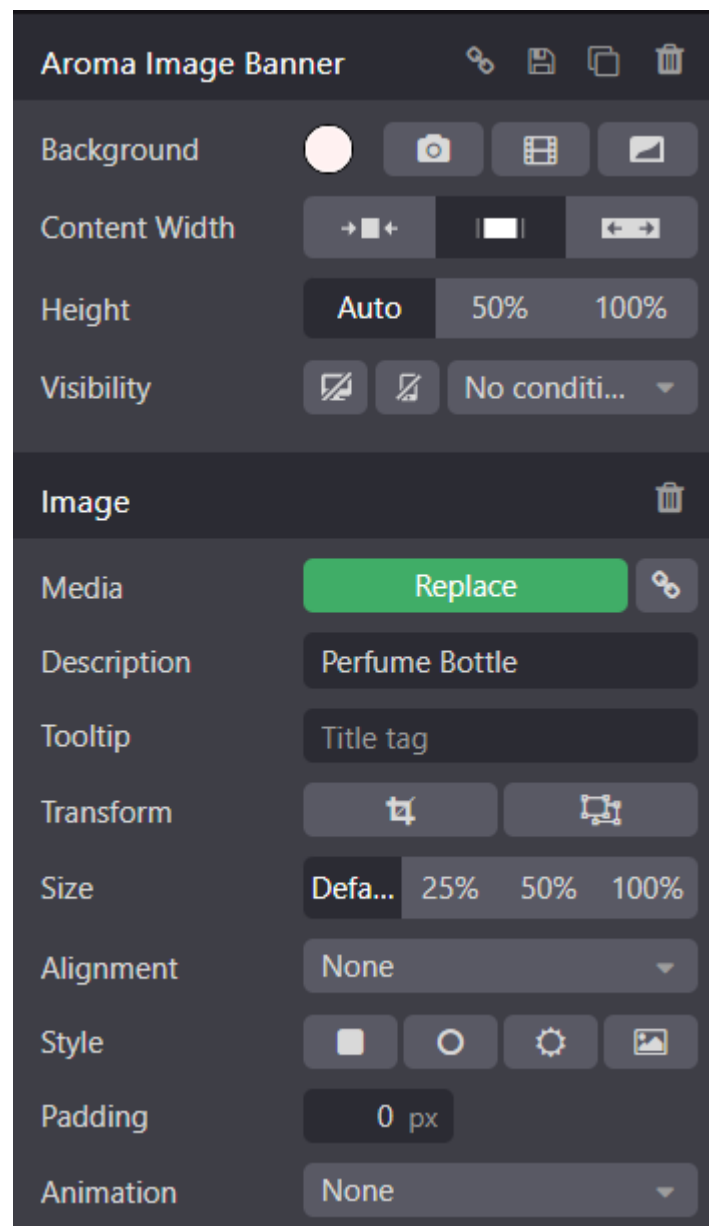

Figure 13 – Customize Aroma Image Banner

- Set the **banner background** using a **solid color**, **image**, or **pattern** for a fully responsive layout.
- All **images** are easily replaceable and can be updated directly from the **Odoo Website Editor**, ensuring proper size and aspect ratio for layout consistency.

- Control **image scaling**, apply **transformations** such as **zoom** or **flip**, and adjust **alignment** for precise positioning.
- Add **smooth entry** or **hover animations** to make the banner more engaging and dynamic.

6.4. Aroma About Banner

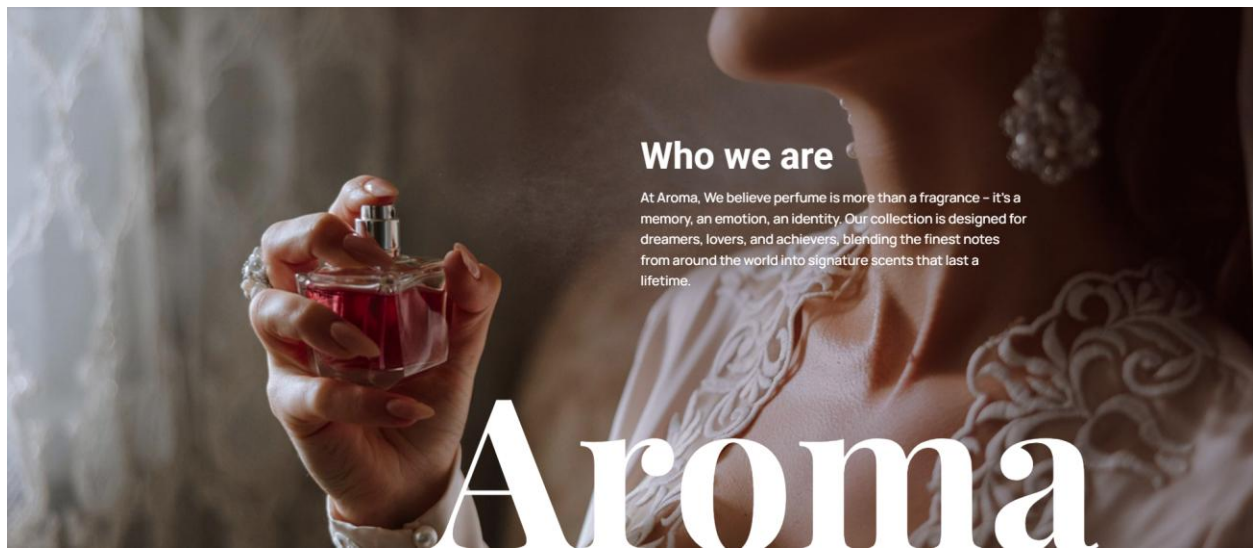

Figure 14 - Select Aroma About Banner

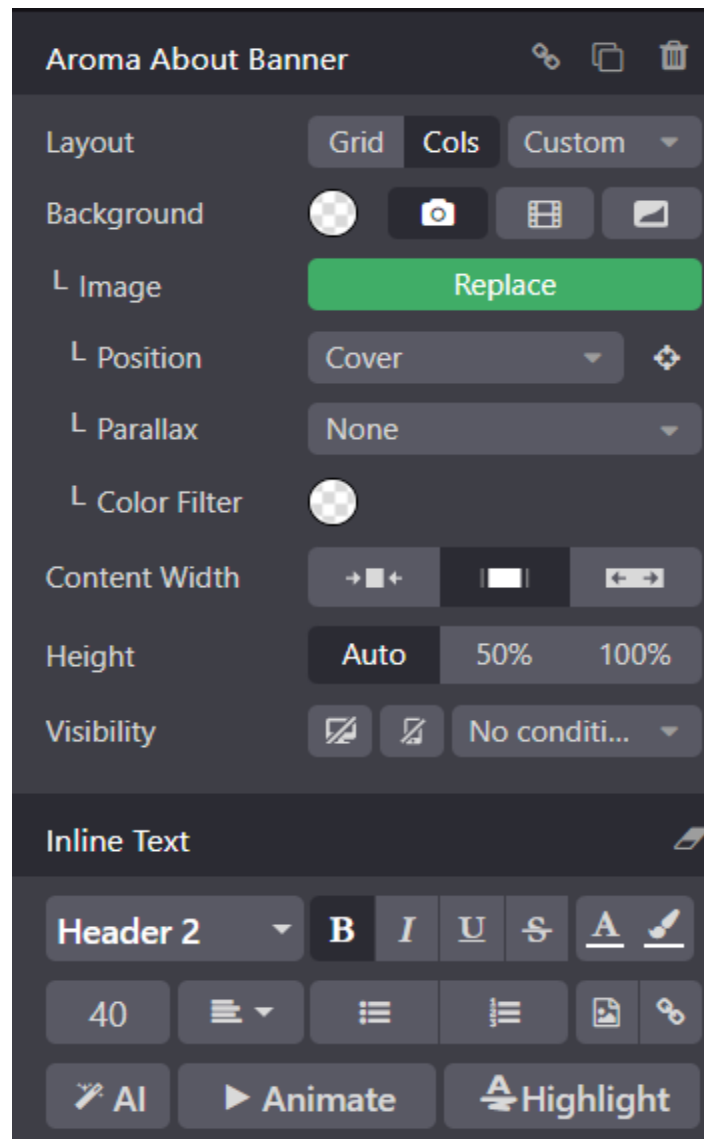

Figure 15 - Customize Aroma About banner

- A dedicated “**About**” layout designed to showcase your **brand identity** or **company story**.
- Choose from **Grid**, **Column**, or **Custom** layouts to structure your About section content effectively.
- Set a **solid color**, **image**, or **video** background with adjustable **position (Cover)**, **parallax scrolling**, and **color filters** for visual depth.

- Customize **headings, fonts, sizes, colors, alignment, and spacing** directly within the banner.
- Add **animation or highlight effects** to create a dynamic and engaging text presentation.

6.5. Aroma Happy Customers

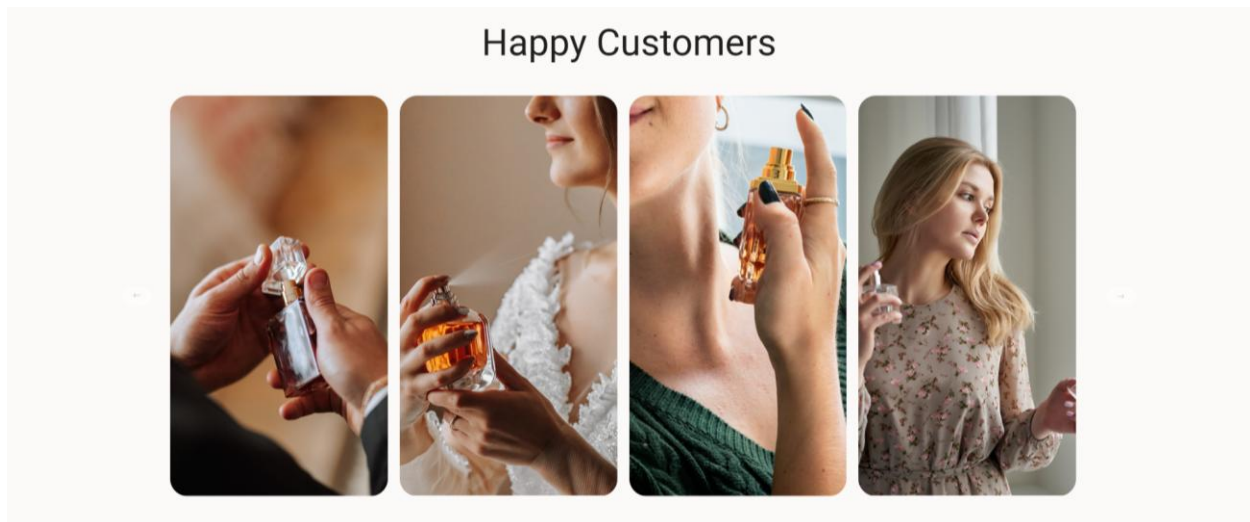

Figure 16 - Aroma Happy Customers

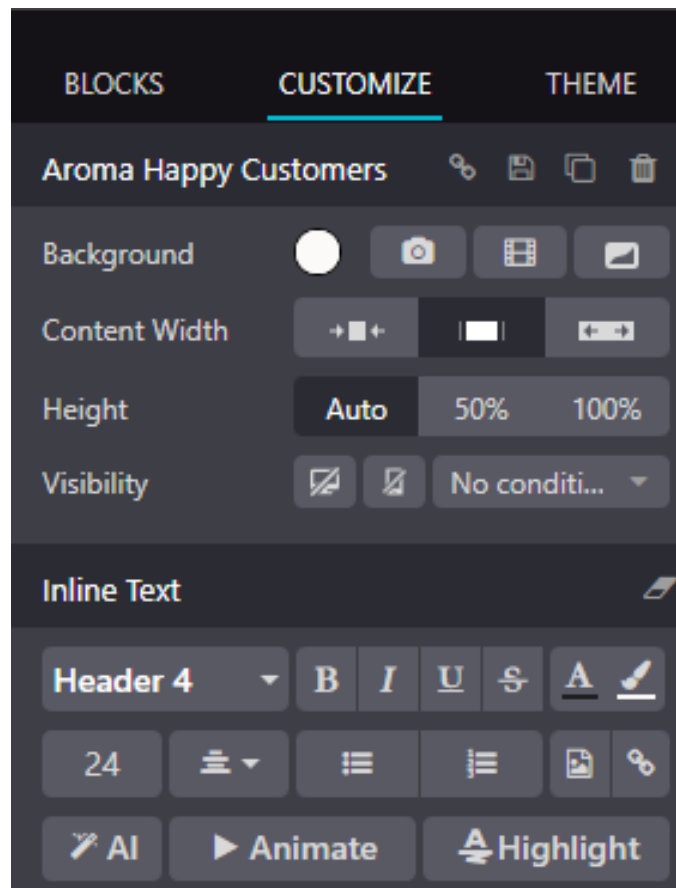

Figure 17 – Customize Aroma Happy Customers

- Display **videos** or **images** of happy customers or brand highlights to boost user engagement.
- Set a **background color**, **image**, or **video** to complement the reel style, and adjust **content width** for **full-width** or **boxed** layouts.
- Control the **section height** and define **visibility conditions** for specific pages or sections.
- Customize **reel cards** with **background colors**, **borders**, **rounded corners**, and **shadow effects** for a refined grid appearance.

- Adjust **card width**, manage **cover image position** and **aspect ratio** for consistent visual balance.
- **Replace or upload media**, add **links**, and include **descriptive text** or **tooltips** to enhance the reel experience.

7. Product Template

1. Go to **Website** → **Editor** → **Edit** → **Blocks** → **Products**.
2. Select the **Product Snippet**.
3. Click on the snippet and choose **Customize** in the editor.
4. Click the **Template** option and change the desired template.

7.1. Product Detail Template

Figure 18 - Product Template

- **Backend Configuration for Product Notes**
 1. Navigate to **Website** → **eCommerce** → **Products** → **New**.
 2. In the **Sales** tab, set the **Category** as *Perfume* and click **Save**.
 3. The **Product Notes** tab will now be available.
 4. Enter the **Labels** and **Values** and click **Save**.

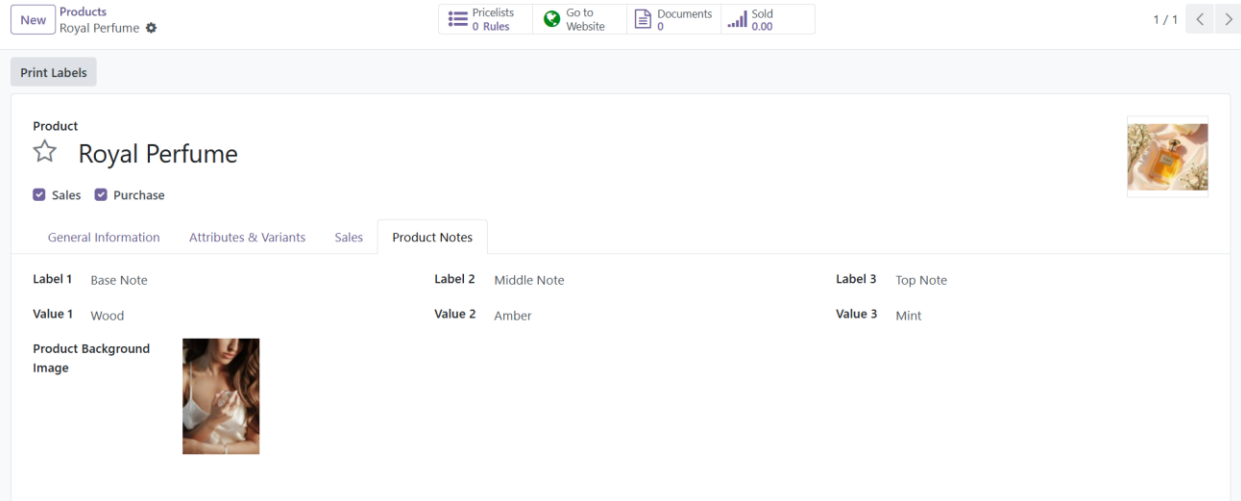

Figure 19 – Product Backend

5. Navigate to the **Attributes** tab in the product form.
6. Create a new **Attribute** with **Display Type** set to *Radio* and define the required **Attribute Values**.
7. Assign **Extra Prices** for each attribute value if applicable.

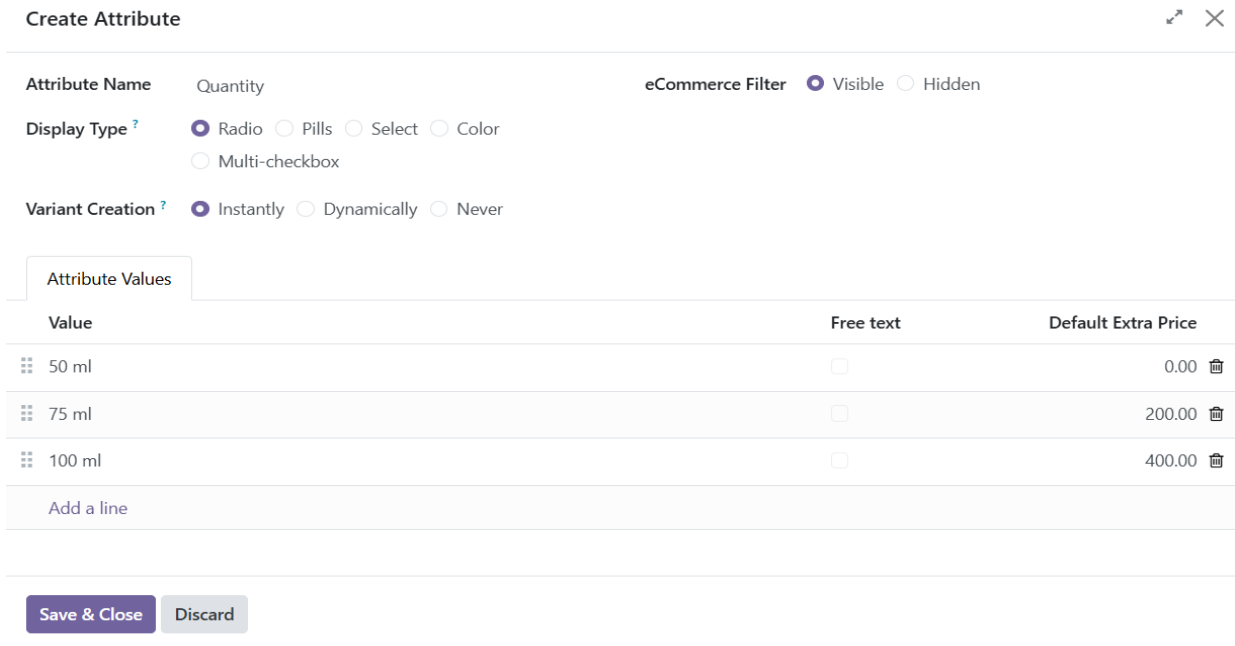

Figure 20 – Create Attribute Backend

8. After Creating, add it in the Attributes and variants section

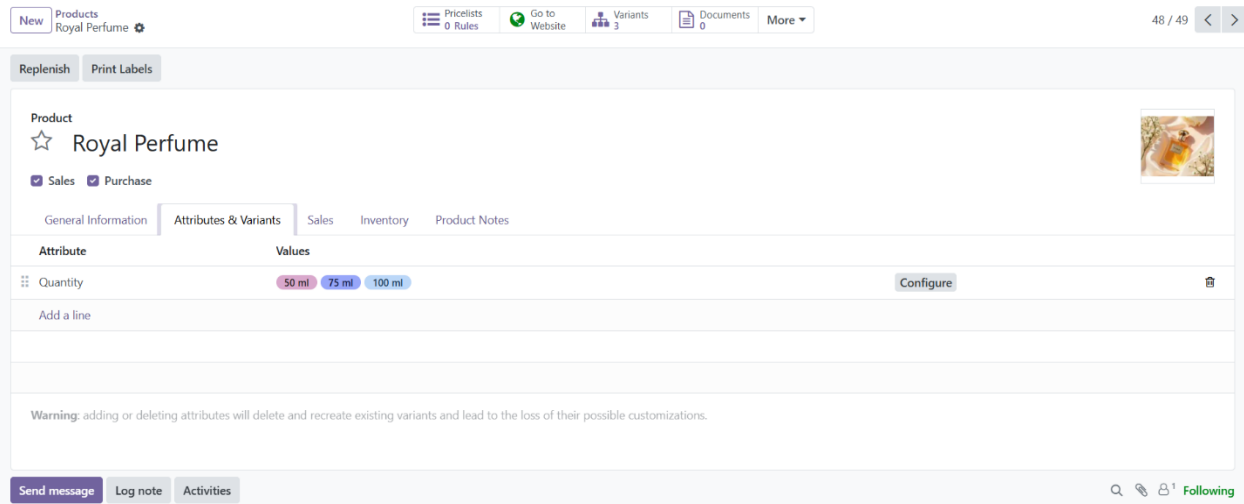

Figure 21- Configure Attributes

- 9. Select the **First Template**.
- 10. The **Product Notes** entered in the backend will be displayed.
- 11. **Variant Selection** is available.
- 12. Click the **Shop Now** button to **Add to Cart**.
