1.0 About WPBAKERY Isotope Addon

Isotope gallery addon or extension for WPBakery page builder, which allows you to add different types and fully responsive isotope galleries. It provides various layout modes of galleries that can be implemented. It also provides options for managing grid space and also provision for adding unified horizontal scrollbar.

2.0 Element Setup

Step 1: Plugin Installation and Activation

We can install and activate the plugin either by uploading to your directory, using your favorite method (ftp, sftp, scp, etc...) or can be installed from WordPress dashboard itself. On successful activation the elements will be available under Isotope tab in Add Elements section.

Fig: 1: Add Element section

Step 2: Element addition.

There are two types of isotope galleries are available with this addon.

- Simple Isotope gallery – Uploaded images will be displayed as an isotope gallery.
- Posttype Isotope gallery – The featured images of chosen posttype will be displayed as gallery.

Add required inputs for the element and customize gallery as per your requirements. All the settings are same for both elements. In Posttype gallery element we need to choose the posttype from which the featured images should be displayed as gallery whereas in Simple isotope gallery images need to be uploaded.

The image shows a settings dialog box titled "WPBakery Isotope Addon Settings". It contains several input fields and dropdown menus:

- Title:** A text input field.
- Box Title:** A text input field.
- Gallery images:** A button with a green plus sign and the text "Enter gallery images."
- Grid space:** A text input field with the instruction "Enter the spacing between grids" below it.
- Unified horizontal scrollbar:** A dropdown menu currently set to "Default scrollbar of browsers". Below it is the instruction "Do you need to add unified horizontal scrollbar for all browsers".
- Layout Mode:** A dropdown menu currently set to "Masonry". Below it is the instruction "select type".
- Additional Class:** A text input field with the instruction "Add additional class(if any)" below it.

At the bottom of the dialog are two buttons: "Close" and "Save changes".

Step 3: Save the element and update the page. Your page with required gallery is all set

3.0 Settings

3.1 Title

Title for the gallery section can be added here.

3.2 Gallery images

The images which are needed to be added in the gallery can be added using this option.

3.3 Grid Space

The space between the images or grid can be added in this option. Required pixel can be entered in the field as number.

Grid space

Enter the spacing between grids

3.4 Unified horizontal scrollbar

Usually, the horizontal scrollbar will be different for different browsers. This option helps us to make a unified plugin custom scrollbar for all browsers. We can either opt for default scrollbar for different browsers or a unified scrollbar for all browsers.
