

# Magento Faktura Webapp

# **Product Specifications**

Magento Faktura Webapp is a Magento extension for managing orders and invoices for Magento. This extension provides an easy means to create orders and thereby reducing the effort of creating order from Magento admin side. A Magento shop owner can make use of this app to manage the sales from his physical store.

This web app order management module works like Magento admin order management section and having some additional features like edit order items without changing the order id, view and process new orders, option to add manual shipping charge, ISR payment processing and reminders. All the updates from the Magento webshop and webapp make use of the same inventory so the shop owner will not have the overhead of managing the stocks separately.

## Features

- Creation of invoices with/without attached orange ISR payment slip
- Automatic ESR generation with sequential invoice number
- Invoice dispatch via your e-mail software.
- Manual entry of invoices if you want to bill for services that were not entered in your Magento Shop
- Temporary deletion of an order
- Automatic import and processing of payments files that you download from your bank
- Automated dunning with 4 temporally configurable dunning levels
- Customizable transaction mails, invoice and reminder
- Accounts receivable overview, sales statistics per store view and total, annual sales comparison, sales statistics for individual articles
