

Fastcheckin

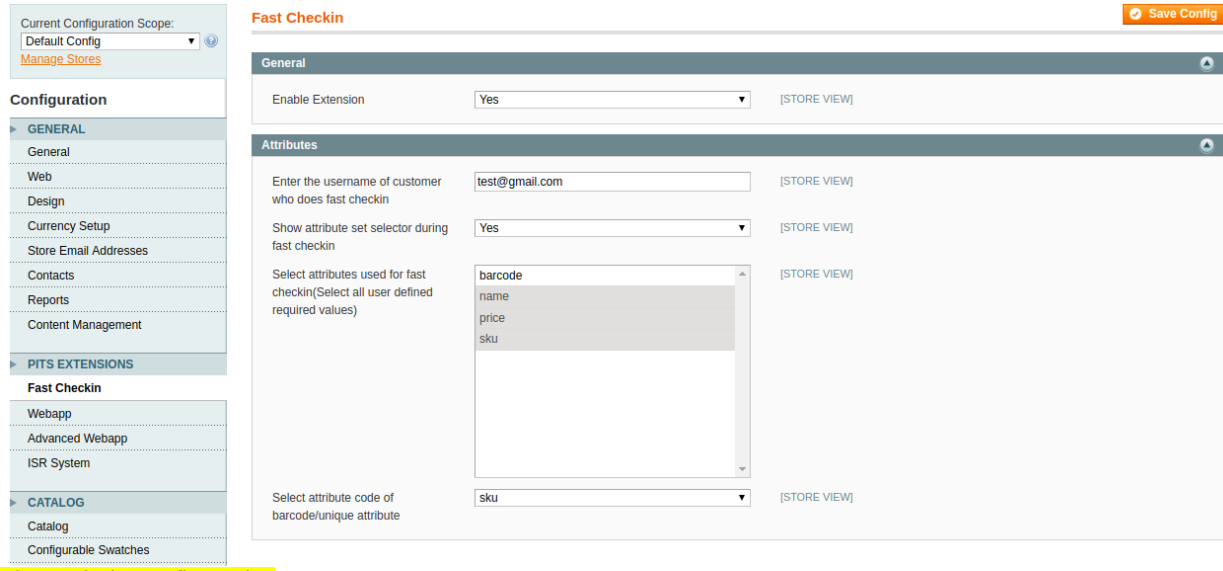

Product specification

Fastcheckin is a Magento extension developed by PIT solutions designed to provide a faster and easier product check-in process compared to the tedious default Magento 'Add Product' process. A warehouse employee will be able to perform product check-in through the Fastcheckin webapp.

Features

- fast check-in products with minimum attributes
- attributeset selector
- user can choose attributes to be entered during fastcheckin process
- for existing products, only unique attribute and quantity is needed
- check-in product by mobilephone camera
