

ChatGPT AI Content Generator for Magento 2

1. Pre-requisites

Magento 2.3.x or 2.4.x.

2. Installation

To install the module, follow the steps below.

- Step 1: Download the module/extension and unzip it.
- Step 2: Access your web server directories and upload the content of the folder into app/code/Pits/ChatGpt/ directory.
- Step 3: Run the following commands to complete the installation.
 - 1. Enable the module php bin/magento module:enable
 - 2. Update of the database php bin/magento setup:upgrade
 - 3. Generate and pre-compile classes php bin/magento setup:di:compile
 - 4.Deploy static files php bin/magento setup:static-content:deploy

3. ChatGPT

If you ever get stuck writing product descriptions or are overwhelmed by writing descriptions for too many products, our module can help you write product descriptions instantly with the click of a button. And it is not just random content, it is the kind that can convert e-window shoppers into repeat customers.

ChatGptChatGPT AI Content Generator for Magento 2 is a Magento 2 extension developed by PIT solutions which is used to generate content from magento backend product form with the help of chatGPT chatbot by open AI.

4.Features

- The content will generate when admin user clicks on Generate Content with ChatGPT button.
- Easily connect OpenAl GPT 3 with Magento 2 using the API key.

- In the backend product add/edit form, to generate content in description/shortdescription attributes, prompt to ChatGPT is generated based on product's name by default.
- Option to automatically set any product attribute values in the content generation prompt.
- Prompt for the ChatGPT will be automatically generated based on the attribute labels and values in the store scope.
- The admin can add a short description of the product with the Generate Content with ChatGPT option.
- The admin can add a product description using the page builder with **Generate Content with ChatGPT** option.
- The admin can add the product description and short description even if the page builder is disabled.
- Admin can add content for CMS Pages and Blocks with Generate Content with ChatGPT Option.
- Admin can add content for category with Generate content with ChatGPT Option.
- By default, content generation based on title or category name in CMS and Categories.
- •

| | | | | * | |

Stores -> Configuration -> Pit Configuration -> Chat Gpt

Enable: Enable/Disable extension,

Title: You can give prompt instructions to ChatGPT using the TITLE field.

ChatGPT API Key: The key used to connect open AI.

Product Attribute: By default, content generation is based on this. If you add multiple attributes, you must keep one space between them. e.g.: {{name}} {{color}}

Attribute label and value is displaying based store view language

Note: If you don't follow correct format, you will never get auto input from product form

6.How to get Product Attribute code {{attribute_code}}

You can get product attribute code from Backend.

Paste the API key in the corresponding field.

This is an Integration with a Third Party Service. Other charges and fees may be required to use this extension on your Store. You can view the pricing for Open AI GPT models here at <u>https://openai.com/pricing</u>.

In OpenAI, tokens serve as the fundamental components of text that language models work with. Tokens can be thought of as pieces of words. These tokens can be either full words or smaller units like sub-words, each assigned a distinct numerical representation. Language models rely on these numerical representations to process and generate text. Essentially, when you feed text into a language model, it dissects it into tokens, examines them, and utilizes this information to generate a response.

12. Technical Requirements / Compatible with:

Magento Community 2.4.x, 2.3.x

13.Supported Languages

English, German, French, Spanish and Italian.

14.Change Log / Release Notes

- Version 1.0.1 April 19, 2023
- Compatible with Open Source (CE): 2.4.6.
- Generate Content with ChatGPT option is now available in backend product description/short description, CMS pages, blocks and Categories.

Version: 1.0.0: Jan 23, 2023

• Initial release.
