

# Advanced ChatGPT AI Content Generator for Magento 2

## 1. Pre-requisites

Magento 2.3.x or 2.4.x.

## 2. Installation

To install the module, follow the steps below.

**Step 1:** Download the module/extension and unzip it.

**Step 2:** Access your web server directories and upload the content of the folder into `app/code/Pits/ChatGptPro/` directory.

**Step 3:** Run the following commands to complete the installation.

1. **Enable the module** - `php bin/magento module:enable`
2. **Update of the database** - `php bin/magento setup:upgrade`
3. **Generate and pre-compile classes** - `php bin/magento setup:di:compile`
4. **Deploy static files** - `php bin/magento setup:static-content:deploy`

## 3. Advanced ChatGPT AI Content Generator for Magento2

Advanced ChatGPT AI Content Generator is a Magento 2 extension developed by PIT solutions which is used to generate AI content from backend product form, category form and CMS page/blocks with the help of chatGPT chatbot by OpenAI.

## 4. Features

- The content will be generated when click on 'Generate Content with ChatGPT' button.
- Easily connect OpenAI GPT 3 or GPT3.5 with Magento 2 using the API key.
- By default, content generation is based on the product's name. But you can change the input from ChatGPT pop-up or using configuration.
- Option to enable/disable the extension from backend on store scope level.

- The admin can add description/short description of the product using the ChatGPT AI.
- Option to automatically set product attribute values in the content generation input.
- Input for the ChatGPT will be automatically generated based on the attribute labels and values in the store scope.
- The admin can add meta description of the product using the ChatGPT AI.
- With the help of mass action admin can add product short description and description for multiple products.
- The admin can add CMS page and Block content using ChatGPT AI.
- The admin can generate AI content for categories using ChatGPT AI.

## 7. Work Flow

Go to Catalog -> Product -> Add Product/Edit Product

The screenshot shows the 'Catalog' dashboard. In the left sidebar, the 'Products' menu item is highlighted with a red box. The main content area displays a summary of business performance with a message: 'Data is invalidated: Configuration, Page Cache. Please go to [Cache Management](#) and refresh cache types.' Below this, there are buttons for 'Reload Data' and 'Go to Advanced Reporting'. A summary card shows 'Revenue US\$0.00', 'Tax US\$0.00', 'Shipping US\$0.00', and 'Quantity 0'. A table titled 'Bestsellers' shows two items with a total of \$29.00.

The screenshot shows the 'Products' list view. The 'Add Product' button is highlighted with a red box. Below the button is a search bar and a table of products. The table has columns for ID, Thumbnail, Name, Type, Attribute Set, SKU, Price, Quantity, Salable Quantity, Visibility, Status, Websites, Action, and Current Features. The first five rows of the table are visible, showing products like 'Joust Duffle Bag', 'Strive Shoulder Pack', 'Crown Summit Backpack', 'Wayfarer Messenger Bag', and 'Rival Field Messenger'.

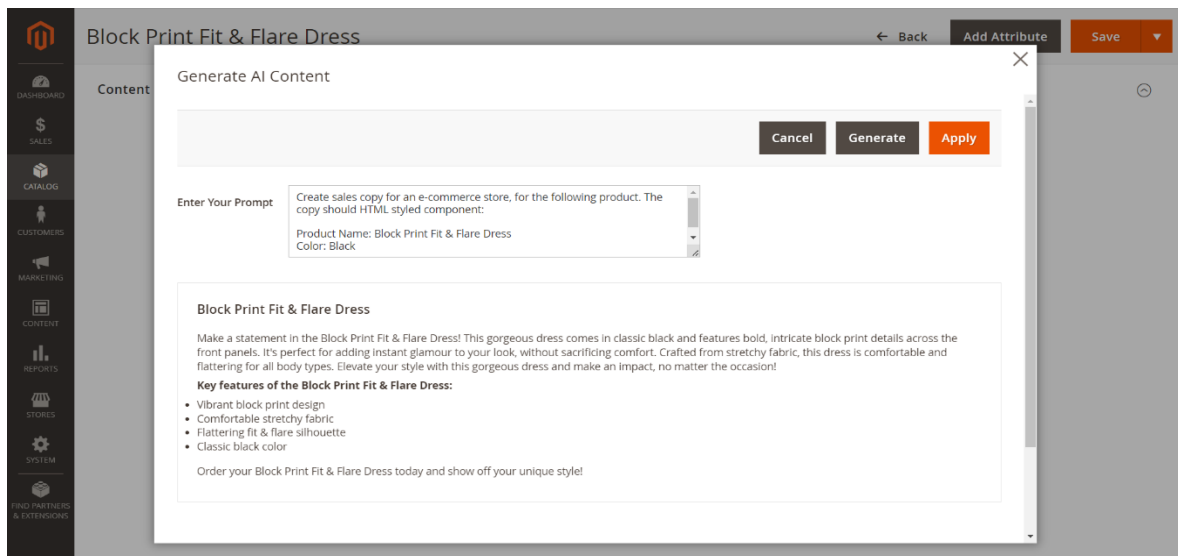

The screenshot shows the 'Joust Duffle Bag' product edit page. The 'Content' tab is highlighted with a red arrow and the text 'Open the content tab'. The page has a sidebar with navigation links for Dashboard, Sales, Catalog, Customers, Marketing, Content, Reports, Stores, System, and Find Partners & Extensions. The main content area shows the product details, including a 'Content' tab, 'Configurations' section, 'Product Reviews', 'Images And Videos', and 'Search Engine Optimization'.

Open content tab in the product form

Click on **Generate Content with ChatGPT** button to generate content

The popup will display when clicking on the **Generate Content with ChatGPT** button and content will generate automatically based on your product name by default. You can change this from backend configuration to show any attribute value when the popup is loaded.

If you wish to change the prompt, you can change the prompt text and generate with "Generate" button in the pop-up

Paste the API key in the corresponding field.

This is an Integration with a Third Party Service. Other charges and fees may be required to use this extension on your Store. You can view the pricing for Open AI GPT models here at <https://openai.com/pricing>

In OpenAI, tokens serve as the fundamental components of text that language models work with. Tokens can be thought of as pieces of words. These tokens can be either full words or smaller units like sub-words, each assigned a distinct numerical representation. Language models rely on these numerical representations to process and generate text. Essentially, when you feed text into a language model, it dissects it into tokens, examines them, and utilizes this information to generate a response.

## Technical Requirements / Compatible with:

Magento Community 2.4.x, 2.3.x

## Supported Languages

English, German, French, Spanish and Italian.

## Change Log / Release Notes

Version: 1.0.1: March 28, 2023
